

FINAL

Stormwater Coalition of Albany County Joint Annual Report

**SPDES General Permit for Stormwater Discharges
from Municipal Separate Storm Sewer Systems (MS4s)
Permit No. GP-0-15-003**

**Reporting Period
March 10, 2017 to March 9, 2018**

BACKGROUND

A requirement of all regulated “MS4” municipalities is the submission of an Annual Report to the New York State Department of Environmental Conservation (NYSDEC) due in FINAL form by June 1. As stated in SPDES General Permit No. GP-0-15-003, Part V. C. 2 and referenced in the MS4 Annual Report Form, “MS4s” may submit a Joint Annual Report provided they have a legally binding agreement with other regulated “MS4s”.

Each of the regulated “MS4s” included in this report are co-signatories of the necessary agreements, in particular the Stormwater Coalition of Albany County Inter-municipal Agreement, pursuant to Article 5-G of New York State General Municipal Law for Traditional MS4s and Memorandum Of Understanding for Non-Traditional MS4s.

The submission of a FINAL Joint Annual Report first involves the release of a DRAFT Joint Annual Report, followed by the collection of public comments, if any. These comments are included in the FINAL Joint Annual Report and used to help guide the implementation of program requirements. Comments regarding any aspect of stormwater program implementation, either for the Coalition or individual MS4 Programs are strongly encouraged and welcome throughout the year. To understand MS4 Permit requirements and related program activities, go to the NYSDEC website and/or the Coalition website: www.albanycountystormwater.com

HOW TO SUBMIT COMMENTS

1. Electronically using the Stormwater Coalition website “Public Comment” interface, www.stormwateralbanycounty.org.
2. By contacting the Local Stormwater Public Contact listed in the Joint Annual Report for each permit holder (See MCC Form).
3. By contacting the individuals listed as Public Contacts on the Coalition website (see Member pages).
4. By e-mail; swcoalition@albanycounty.com or phone; 447-5645.

OTHER INFORMATION

Hard copies of this Joint Annual Report are located at the Stormwater Coalition office, 175 Green Street, Albany, NY 12202 and at local MS4/municipal offices

For the address of local MS4/municipal offices, go to the Annual Report of interest, MCM 2 Page 4 of 6.

JOINT ANNUAL REPORT FORMAT

The Annual Report document is a form developed by NYSDEC and as such provides a snapshot of program activities pertaining to individual member and collaborative Coalition activities. This Joint Annual Report includes individual Annual Reports organized by MS4 type, see order below with shared Coalition data inserted at the end of each individual report. The SPDES Permit No. of each MS4 is in parenthesis. Goals for the upcoming year are based on an updated Joint Stormwater Management Program Plan document completed in April, 2018 (SWMP Doc 2018-2019). To view the SWMP Plan document, see Coalition website.

12. Evaluating Progress Toward Measurable Goals MCM 3

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

The Village DPW will perform Outfall Reconnaissance Inventory assessments (ORIs) reporting on 100% of the stormwater outfalls in the Village MS4 system.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

ORIs were conducted for all of the 45 mapped outfalls within the Village (45). Storm system mapping was confirmed with assistance from the Albany County Stormwater Coalition (1). The Coalition subsequently identified an additional 27 outfalls within the Village (27) bringing the total to 72 outfalls or 100% mapped. The connected drainage system was also mapped completing the storm sewer shed mapping (1).

C. How many times was this observation measured or evaluated in this reporting period?

D. Has your MS4 made progress toward this measurable goal during this reporting period?
☒ Yes ☐ No
E. Is your MS4 on schedule to meet the deadline set forth in the SWMPP?
☒ Yes ☐ No
F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

A public meeting is held annually to present our MS4 program and solicit public comment. The annual meeting was held this year on Monday, May 21, 2018, prior to the Village Board meeting. All Board members and relevant staff were present as were several members of the public. After a presentation by Sean Ward comments & questions were solicited. There were no comments or questions.

The minutes of the Annual MS4 Presentation to the Board of Trustees of the Village of Green Island and the general public was held on Monday, May 21, 2018 at 6:30 p.m. at the Green Island Municipal Center, 19 George Street, Green Island, New York.

Mayor McNulty-Ryan stated that the first item is the Annual MS4 Presentation by Sean E. Ward.

Sean proceeded to give overview and highlights of the program and everyone had a handout of the presentation.

Sean went on to say that the highlights of the program for the past year. The Stormwater Coalition is a group of municipalities in Albany County that work together to assist each other with the permit requirements. We have a formal Intermunicipal committee that continues to assist with public education and outreach programs.

We have continued sponsorship and participation in the environmental cleanup programs that we have in Green Island which include the Spring Cleanup, Street Sweeping, Catch Basin inspection and cleaning, which is done regularly and on a schedule throughout the year.

We have passed laws for detection and elimination of Illicit Discharges and Stormwater Management and Erosion and Sediment Control and both of those were adopted in 2007 and we continue to enforce those laws and this year, we actually had one for the first time, a violation that was where somebody was issued a fine for a violation of our Stormwater Law. It was actually an illegal dumping which occurred last May.

We have developed an existing system outfall and catch basin mapping system and we delineated major watersheds/sewersheds within the Village. The Mapping system is an in-house mapping system that we use to map our catch basins, where all of our systems are located in the Village. We have separated in the last couple of years, Albany Avenue and we took that out of the combined sewer system and we have added Filterra, which is a mechanism where we filter the storm water before it gets to the outfall and that has been a very good system and our Public Works Department maintains it a few times a year and it is located on Albany Avenue. It is basically sand filtering of large particles.

Mayor McNulty-Ryan stated that is the area where the trees and grates are on Albany Avenue.

Sean stated that we will continue to review all commercial development projects for compliance with the Phase II Stormwater Regulations, and provide opportunities for public comments. The big project this year and the biggest one that we have probably had in several years is the Starbuck Island Project with Luizzi Bros. and that is just a huge project, 270 apartment units and some commercial development that is going to require a lot of inspection. If you go over on any given day, they are doing an environmental cleanup right now and there are probably 10 hard hats and vests people overseeing that operation and even after the environmental cleanup, we will have people daily over there inspecting the stormwater to make sure that they are in compliance. The Village Board, Planning and Zoning Boards and all of our staff have attended workshops and/or technical sessions to train and make sure that we are trained properly in stormwater education and stormwater compliance with our laws and we have coordinated our

training with the Capital District Regional Planning Commission and the Albany County Stormwater Coalition. He would say that this board and the staff are more educated than most in the area on stormwater topics because you all participated in training.

We will continue municipal operations to minimize pollutants to the greatest extent practicable. All of our Public Works staff is fully trained in facility maintenance and spill prevention, illicit discharge and they also are very much in compliance with the catch basin cleaning component, where we partner with the Albany County Sewer District which keeps that debris out of the river and streams.

We will continue to develop educational efforts and outreach programs. We are very proactive, our monthly newsletter, he believes that 9 out the last 12 months last year, we had some kind of environmental stormwater message about keeping clean water. Anne just recently sent out some brochures to all the businesses in Green Island and they received brochures related to their business that tells them a little about stormwater practices or best management practices in their facility. Then, we also have the Village and the Coalition websites, we have a little bit on the Village website but a lot of that information will direct users toward the Albany County website which has many, many different practices on it and more information.

The Stormwater Management Plan was developed and implemented in compliance with the new permit.

The enforcement of local laws to control runoff and reduce pollutants: Illicit discharges, he mentioned that we did have one this year and Maggie fined them for that and construction sites, we had two (2) this year, and we had the smaller site at 75 Cohoes Avenue, which is complete now. It is in post-construction management and Luizzi, the Starbuck site, which is a huge undertaking, as he previously stated, he mentioned post construction stormwater management, 85 Cohoes Avenue and Albany Avenue are under post construction compliance. They are inspected sporadically to make sure that they remain in compliance. Our Public Works crew maintains the Filterra system, they maintain the Vortex system, which takes large debris out of the system and we have two (2) of those, one located on Albany Avenue and the other one is in the Ford parking lot which serves all of the stormwater in the majority of the north end.

We also as part of post construction this year we brought the facilities manager from Galesi Corp. which is basically the whole north end of the Village and we had him come down and train with our Public Works staff, which is a multi-jurisdictional effort so that they are all on the same page.

Sean stated that highlights of the program for this coming year, we really don't plan on changing much, we are under a new permit so we will continue and review and provide opportunities for public comment on all commercial development and compliance with Phase II Stormwater Regulations and we will continue to enhance the permitting system for developers and contractors to follow.

Last year we put together a form and procedures compendium and this is for our staff and for the developers and contractors to follow and they use it on inspections as well. We will educate

contractors and developers, every time there is training related to erosion control, he sends it to all the contractors that are working in the Village of Green Island and they have to have a four hour certification in order to work here, anywhere in New York State actually.

He will continue to provide field inspection and recording practices for related construction activities and additional training opportunities to be attended. We now have Maggie Alix working with our Village Engineer, Garry Nathan and this board approved starting June 1st a part time Code Enforcement Officer and they will all be out working on enforcement of these laws and regulations.

We will continue to evaluate current Village practices for municipal operations to minimize pollution to receiving waters and that was part of EPA Compliance Audit and we will continue to work off of that.

Sean stated following that is our organizational chart, which Sean reviewed and highlighted for everyone.

Sean went onto the last slide which is the Website Information and noted that our Annual Report for the period covering March 10, 2017 to March 9, 2018 is available at the www.villageofgreenisland.com or www.stormwateralbanycounty.org . We will take comments here tonight or by the deadline of 12 Midnight tonight, May 21st at seanw@villageofgreenisland.com.

No comments.

Mayor McNulty-Ryan closed the MS4 presentation.

Minimum Control Measure 6. Stormwater Management for Municipal Operations

The information in this section is being reported (check one):

- ☒ On behalf of an individual MS4
☐ On behalf of a coalition

How many MS4s contributed to this report?

- 1. Choose/list each municipal operation/facility that contributes or may potentially contribute Pollutants of Concern to the MS4 system. For each operation/facility indicate whether the operation/facility has been addressed in the MS4's/Coalition's Stormwater Management Program(SWMP) Plan and whether a self-assessment has been performed during the reporting period. A self-assessment is performed to: 1) determine the sources of pollutants potentially generated by the permittee's operations and facilities; 2) evaluate the effectiveness of existing programs and 3) identify the municipal operations and facilities that will be addressed by the pollution prevention and good housekeeping program, if it's not done already.**
