

***Stormwater Coalition of Albany County***

**Village of Voorheesville  
New York**

**MS4 Permit No. NYR20A210**

**Annual Evaluation  
(April, 2020)**

**Storm Water Management Program Plan  
(BMPs and Measurable Goals)  
2020 to 2021**

## A. History of Coalition SWMP Plan Document

The current MS4 Permit (NYSDEC MS4 Permit No. GP-0-15-003) allows regulated entities to collaborate when creating and updating their Stormwater Management Program (SWMP) and Stormwater Management Program Plan (SWMP Plan). For details, see Appendix A MS4 Permit No. GP-0-15-003 Excerpts: Collaboration, SWMP Plan, and Annual Report Requirements.

To that end and dating back to when the Stormwater Coalition of Albany County was formed in 2009 (inter-municipal agreement) the public entities listed below have routinely prepared a Joint Stormwater Management Program document using 'CBI' MS4Web software. The document has historically been referred to as a *SWMP Plan*. It is a compilation of goals noting planned activities and whether or not the activity was completed.

However, according to the current MS4 Permit, the SWMP Plan in its entirety includes not only the annual tracking of progress meeting measurable goals, but also documents retained by each MS4/municipality verifying that the goals have been met. These include written procedures, outfall inspection data sheets, adopted local laws, procedures related to municipal operations, etc.

This past year as a consequence of software changes and maintenance costs, Coalition members decided to discontinue using 'CBI' MS4Web. Instead a spreadsheet tracking tool was created which merges the most functional content of the NYSDEC DRAFT MS4 Permit released in 2016 with high priority requirements of the current MS4 Permit. Together these requirements are assumed to be the Best Management Practices each MS4 should implement in order to reduce the discharge of pollutants from their small MS4 to the maximum extent practicable.

For the Stormwater Coalition, updating BMPs and program goals is a collaborative, annual effort. Typically strengths and weaknesses of individual programs are discussed, goals reviewed, often modified, and new goals created to help the MS4/municipality prioritize future activities. Coalition services are discussed as well and goals specific to the Coalition are evaluated, modified, and new goals created as needed. The role of the Coalition is to organize and facility these evaluations and prepare the final document for posting on the Coalition website.

The process itself is best described as an Annual Evaluation and for this reason, rather than refer to this document as a SWMP Plan, it is instead described as an Annual Evaluation, specifically that piece of the all-inclusive SWMP Plan which describes progress meeting measurable goals associated with particular Best Management Practices (BMPs).

## B. Participating MS4s by Type and Coalition Participation

Below is a list of Coalition members who participated in the April 2020 Annual Evaluation. They are grouped by type of MS4 and an Annual Evaluation has been prepared for each Coalition MS4/municipality. There is also an annual evaluation for the Stormwater Coalition. While not a regulated MS4, the Stormwater Coalition is directly involved with permit implementation and goals pertaining to the Coalition are detailed in their annual evaluation. \*Due to Covid-19 restrictions, where indicated the Annual Evaluation will be incorporated at a later date.

<b>Traditional Non Land Use Control MS4 (County)</b>	<b>Traditional Land Use Control MS4s (Town, Village, City)</b>	
1. Albany County (NYR20A359)	3. City of Albany (NYR20A464)	8. Town of Guilderland (NYR20A211)

NEW YORK STATE  
DEPARTMENT OF ENVIRONMENTAL CONSERVATION  
SPDES GENERAL PERMIT  
FOR STORMWATER DISCHARGES

From

**MUNICIPAL SEPARATE STORM SEWER SYSTEMS (MS4s)**

Permit No. GP-0-15-003

Issued Pursuant to Article 17, Titles 7, 8 and Article 70  
of the Environmental Conservation Law

Effective Date: May 1, 2015

Expiration Date: April 30, 2017

Modification Dates

July 15, 2015 - Correction of Table IX.C and Appendix 2 to reflect GP-0-10-002 October  
2011 Modification

January 13, 2016 - Additional reporting for covered entities in the watersheds listed in  
Part IX

Stu Fox  
Deputy Chief Permit Administrator

  
Authorized Signature

1 / 12 / 16  
Date

Address: NYS DEC  
Division of Environmental Permits

(Part III.B.3.)

Within three years of having modified its SWMP to ensure that reduction of the POC specified in the TMDL is achieved, covered entities in future TMDL areas must assess their progress and evaluate their SWMP to determine the MS4's effectiveness in reducing their discharges of TMDL POC(s) to TMDL water bodies. This assessment shall be conducted for the portions of the *small MS4 storm sewershed* that are within the TMDL watershed. The assessment shall be done using *Department* supported modeling of pollutant loading from the *storm sewershed*.

## Part IV. Stormwater Management Program (SWMP) Requirements

### A. SWMP Background

*Covered entities must develop (for newly authorized MS4s, implement), and enforce a SWMP designed to reduce the discharge of pollutants from small MS4s to the maximum extent practicable ("MEP") in order to protect water quality and to satisfy the appropriate water quality requirements of the ECL and the CWA. The objective of the permit is for MS4s to assure achievement of the applicable water quality standards. Covered entities under GP-0-10-002 must have prepared a SWMP plan documenting modifications to their SWMP. See Part X.B. (Definitions) for more information about the SWMP and SWMP plan.*

The SWMP and SWMP plan may be created by an individual covered entity, by a shared effort through a group or coalition of individual covered entities, or by a third party entity. The SWMP plan shall be made readily available to covered entity's staff, to the public and to *Department* and EPA staff.

### B. Cooperation Between Covered Entities Encouraged

The *Department* encourages covered entities to cooperate when developing and implementing their SWMP<sup>2</sup>. However, each covered entity is responsible for obtaining its own permit coverage and for filing its own NOI. Irrespective of any agreements between covered entities, each individual covered entity remains legally responsible for satisfying all GP-0-15-003 requirements and for its own discharges. If one covered entity is relying on another covered entity to satisfy one or more of its permit obligations, that fact must be noted on the covered entity's MOC form. The other entity must, in fact,

---

<sup>2</sup> For example, villages are encouraged to cooperate with towns, towns with counties, and adjacent counties with each other. In addition, municipal governments are encouraged to coordinate and cooperate with non-traditional MS4s such as DOT, school and fire districts, Federal and State facilities located within and adjacent to their jurisdictions. Sewer boards, water boards, or other non-traditional entities are encouraged to partner with the municipality (municipalities) that they serve.

(Part IV.B.)

*implement the MCM(s) and must agree to implement the MCM(s) on the first covered entity's behalf. This agreement between the two or more parties must be documented in writing and signed by both (all) parties. Part IV.G. below may apply if such an agreement is not already in place. The agreement must be included in the SWMP plan, and be retained by the covered entity for the duration of this SPDES general permit, including any administrative extensions of the permit term.*

*Covered entities that are working together to develop (for newly authorized MS4s) or implement their SWMPs are encouraged to complete shared annual reports. Covered entities may also hold a group meeting to present their annual reports to the public and to receive comments on their annual reports. These options are discussed in more detail in Part V.C.2.*

## C. Annual Reporting

### 1. Annual Report Submittal

The annual reporting period ends March 9 of each year. The annual report must be received in the *Department's* Central Office, electronic or hard copy, no later than June 1 of each reporting year. If electronic, submit in accordance with procedures set forth by the *Department*. If mailed, send to the address below:

SPDES General Permit for Stormwater Discharge from MS4s, GP-0-15-003

19

(Part V.C.1.)

NYS DEC "MS4 Coordinator"  
Bureau of Water Permits  
625 Broadway, 4<sup>th</sup> Floor  
Albany, NY 12233-3505

Failure to submit a complete annual report and a complete MCC form (Part V.D) shall constitute a permit violation.

a. **Annual Report Submittal for Newly Regulated Covered entities (Small MS4s not Previously Authorized by GP-0-10-002)**

Newly regulated covered entities *developing* their *SWMP* are to submit their Annual Report in a format provided by the *Department*. They will provide, at a minimum, the information on the annual report form and the information required by Parts VII or VIII.

Newly regulated covered entities are required to submit their first annual report the year that authorization is granted if authorization is granted on or before December 31 of that reporting year.

b. **Annual Report Submittal for Covered entities Authorized by GP-0-10-002 (Continuing Covered entities)**

Beginning with annual reports due in 2010 covered entities implementing their *SWMP* shall submit, at a minimum, information specified by the *Department* in Part VII or VIII in a format provided by the *Department*.

## 2. Shared Annual Reporting and Submittal

*Covered entities working together to develop (for newly authorized MS4s) and /or implement their SWMPs may complete a shared annual report. The shared annual report is an annual report that outlines and explains group activities, but also includes the tasks performed by individual covered entities (BMPs, measurable goals, schedules of planned activities, etc.). To facilitate the submission of one annual report for the entire group of covered entities, individual covered entity's activities may be incorporated into the report by either:*

- *providing the details specific to their small MS4(s) to a person(s) who incorporates that information into the group report. That one group report is submitted to the Department for all participating small MS4s; or*
- *providing the details specific to their small MS4(s) on a separate sheet(s) that will be attached with the one group report.*

SPDES General Permit for Stormwater Discharge from MS4s, GP-0-15-003

20

(Part V.C.2.)

Regardless of the method chosen, each covered entity must, by June 1 of the annual reporting year:

- a. Provide their individual MCC form (see Part V.D) to be submitted with the shared annual report. Each covered entity must sign and submit an MCC form to take responsibility for all of the information in the annual report, which includes specific endorsement or acceptance of the shared annual report on behalf of the individual covered entity;
- b. Present their draft annual report at a meeting (see Part VII.A.2.d or Part VIII.A.2.d for more information). For completed shared annual reports, the report may be presented by each participating individual covered entity at an existing municipal meeting or may be made available for comments on the internet. Additionally, covered entities participating in shared annual reporting may combine meetings to have a group or regional meeting. While the group meeting is allowable, each covered entity shall ensure that local public officials and members of the public are informed about the program, activities and progress made; and
- c. Submit a summary of any comments received and (intended) responses on the individual covered entity's information or the shared annual report information, as applicable. This information should be included with the annual report submission. Changes made to the SWMP in response to comments should be described in the annual report.

### 3. Annual Report Content

The annual report shall summarize the activities performed throughout the reporting period (March 10 to March 9) and must include at a minimum:

- a. The status of compliance with permit conditions, including Watershed Improvement Strategy conditions;
- b. An assessment/evaluation of:
  - i. the appropriateness of the identified *BMPs*;
  - ii. progress towards achieving the statutory goal of reducing the *discharge of pollutants* to the *MEP*; and
  - iii. the identified *measurable goals* for each of the *MCMs*.
- c. Results of information collected and analyzed, monitoring data, and an assessment of the *small MS4's SWMP* progress toward the statutory goal of reducing the *discharge of pollutants* to the *MEP* during the reporting period. This could include results from required *SWMP* reporting, estimates of pollutant loading (from parameters such as identified illicit discharges, physically interconnected *small MS4s* that may contribute substantially to pollutant

SPDES General Permit for Stormwater Discharge from MS4s, GP-0-15-003

21

loadings from the *small MS4*) and pollutant load reductions (such as illicit discharges removed). This assessment may be submitted as an attachment;

- d. When required to be completed, results of assessments of effectiveness in meeting no net increase requirements or TMDL loadings as required by III. B.1 and 2. These results must be submitted in evaluation forms and as an attachment;
- e. A summary of the stormwater activities planned to be undertaken during the next reporting cycle (including an implementation schedule);
- f. Any change in identified *BMPs* or *measurable goals* and justification for those changes;
- g. Notice that a *small MS4* is relying on another entity to satisfy some or all of its permit obligations (if applicable);
- h. A summary of the public comments received on this annual report at the public presentation required in Part VII.A.2. or VIII.A.2. And, as appropriate, how the *small MS4* will respond to comments and modify the program in response to the comments;
- i. A statement that the final report and, beginning in 2009, the SWMP plan are available for public review and the location where they are available; and
- j. The information specified under the reporting requirements for each *MCM* (Part VII or VIII).

## Part X. ACRONYMS AND DEFINITIONS

### A. Acronym List

BMP - Best Management Practice  
CFR - Code of Federal Regulations  
CWA - Clean Water Act  
ECL - Environmental Conservation Law  
MCC - Municipal Compliance Certification  
MCM - Minimum Control Measure  
MEP - Maximum Extent Practicable  
MS4 - Municipal Separate Storm Sewer System  
NPDES - National Pollutant Discharge Elimination System  
POC - Pollutant of Concern  
SPDES - State Pollutant Discharge Elimination System  
SWMP - Stormwater Management Program  
SWMP Plan - Stormwater Management Program Plan  
SWPPP - Stormwater Pollution Prevention Plan  
TMDL - Total Maximum Daily Load  
UA - Urbanized Area

### B. Definitions

Activities - See best management practice

Additionally Designated Areas - EPA required the Department to develop a set of criteria for designating additional MS4 areas as subject to these regulations. The following criteria have been adopted to designate additional MS4s in New York State:

Criteria 1: MS4s discharging to waters for which and EPA-approved TMDL required reduction of a pollutant associated with stormwater beyond what can be achieved with existing programs (and the area is not already covered under automatic designation as UA).

Criteria 2: MS4s contiguous to automatically designated urbanized areas (town lines) that discharge to sensitive waters classified as AA Special (fresh surface waters), AA (fresh surface waters) with filtration avoidance determination or SA (saline surface waters).

Criterion 3: Automatically designated MS4 areas are extended to Town, Village or City boundaries, but only for Town, Village or City implementation of Minimum Control Measures (4) Construction Site Stormwater Runoff Control and (5) Post Construction Stormwater Management in Development and Redevelopment. This additional designation may be waived, by written request to the Department, where the automatically designated area is a small portion of the total area of the Town, Village or City (less than 15 %) and where there is

**Stormwater Management Program** - the program implemented by the covered entity. Covered entities are required at a minimum to develop, implement and enforce a SWMP designed to address POCs and reduce the discharge of pollutants from the small MS4 to the MEP, to protect water quality, and to satisfy the appropriate water quality requirements of the ECL and Clean Water Act. The SWMP must address the MCM described in Part VIII.

The *SWMP* needs to include *measurable goals* for each of the *BMPs*. The measurable goals will help the covered entities assess the status and progress of their program. The SWMP should:

1. describe the BMP / measureable goal;
2. identify time lines / schedules and milestones for development and implementation;
3. include quantifiable goals to assess progress over time; and
4. describe how the covered entity will address POCs.

Guidance on developing SWMPs is available from the Department on its website. Examples of successful SWMPs and suggested measurable goals are also provided in EPA's Menu of BMPs available from its website. Note that this information is for guidance purposes only. An MS4 may choose to develop or implement equivalent methods equivalent to those made available by the Department and EPA to demonstrate compliance with the MCMs.

When creating the *SWMP*, the *covered entities* should assess activities already being performed that could help meet, or be modified to meet, permit requirements and be included in the *SWMP*. *Covered entities* can create their *SWMP* individually, with a group of other individual *covered entities* or a coalition of *covered entities*, or through the work of a third party entity.

**Stormwater Management Program Plan**- used by the covered entity to document developed, planned and implemented SWMP elements. The *SWMP plan* must describe how pollutants in stormwater runoff will be controlled. For previously unauthorized *small MS4s* seeking coverage, information included in the NOI should be obtained from the *SWMP plan*.

**Stormwater Management Program Plan-** used by the covered entity to document developed, planned and implemented SWMP elements. The *SWMP plan* must describe how pollutants in stormwater runoff will be controlled. For previously unauthorized *small MS4s* seeking coverage, information included in the NOI should be obtained from the *SWMP plan*.

SPDES General Permit for Stormwater Discharge from MS4s, GP-0-15-003

97

The *SWMP plan* is a separate document from the NOI and should not be submitted with the NOI or any annual reports unless requested.

The *SWMP plan* should include a detailed written explanation of all management practices, activities and other techniques the covered entity has developed, planned and implemented for their SWMP to address POCs and reduce pollutant discharges from their small MS4 to the MEP. The *SWMP plan* shall be revised to incorporate any new or modified BMPs or measurable goals.

*Covered entities* can create their *SWMP plan* individually, with a group of other individual *covered entities* or a coalition of *covered entities*, or through the work of a third party entity.

Documents to include are: applicable local laws, inter-municipal agreements and other legal authorities; staffing and staff development programs and organization charts; program budget; policy, procedures, and materials for each minimum measure; outfall and small MS4 system maps; stormwater management practice selection and measurable goals; operation and maintenance schedules; documentation of public outreach efforts and public comments; submitted construction site SWPPPs and review letters and construction site inspection reports.

The *SWMP plan* shall be made readily available to the covered entity's staff and to the public and regulators, such as *Department* and EPA staff. Portions of the *SWMP plan*, primarily policies and procedures, must be available to the management and staff of a *covered entity* that will be called upon to use them. For example, the technical standards and associated technical assistance documents and manuals for stormwater controls should be available to code enforcement officers, review engineers and planning boards. The local laws should be readily available to the town board and planning board. An integrated pest management program would have to be available to the parks department and the stormwater outfall and available sewer system mapping and catch basin cleaning schedule would have to be available to the department of public works.
