Text of law should be given as amended. Do not include matter being eliminated and do not use italics or underlining to indicate new matter.

County
City
Town
Village

of Bethlehem

Local Law No. 7 of the year 2007

A local law Establishing a new Chapter 98 within the Code of the Town of Bethlehem for
Stormwater Management; amend Chapter 103 Subdivision Regulations, Chapter 128
Zoning Law; and Chapter 97 Solid Waste.

Be it enacted by the Town Board of the

County
City
Town
Village

of Bethlehem

as follows:

**STORMWATER MANAGEMENT LOCAL LAW
SECTION ONE
Prohibition of Illicit Discharges, Activities
and Connections to
Separate Storm Sewer System**

Article 1 – General Provisions

Section 1. Purpose/Intent.

The purpose of this law is to provide for the health, safety, and general welfare of the citizens of the Town of Bethlehem through the regulation of non-stormwater discharges to the municipal separate storm sewer system (MS4) to the maximum extent practicable as required by federal and state law. This law establishes methods for controlling the introduction of pollutants into the MS4 in order to comply with requirements of the SPDES General Permit for Municipal Separate Storm Sewer Systems. The objectives of this law are:

- 1.1 To meet the requirements of the SPDES General Permit for Stormwater Discharges from MS4s, Permit no. GP-02-02 or as amended or revised;
- 1.2 To regulate the contribution of pollutants to the MS4 since such systems are not designed to accept, process or discharge non-stormwater wastes;
- 1.3 To prohibit Illicit Connections, Activities and Discharges to the MS4;

(If additional space is needed, attach Pages the same size as this sheet, and number each.)

- 1.4 To establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this law; and
- 1.5 To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, wastewater, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment and other pollutants into the MS4.

Section 2. Definitions.

Whenever used in this law, unless a different meaning is stated in a definition applicable to only a portion of this law, the following terms will have meanings set forth below:

- 2.1 **Best Management Practices (BMPs).** Schedules of activities, prohibitions of practices, general good house keeping practices, pollution prevention and educational practices, maintenance procedures, and other management practices to prevent or reduce the discharge of pollutants directly or indirectly to stormwater, receiving waters, or stormwater conveyance systems. BMPs also include treatment practices, operating procedures, and practices to control site runoff, spillage or leaks, sludge or water disposal, or drainage from raw materials storage.
- 2.2 **Clean Water Act.** The Federal Water Pollution Control Act (33 U.S.C. § 1251 et seq.), and any subsequent amendments thereto.
- 2.3 **Construction Activity.** Activities requiring authorization under the SPDES permit for stormwater discharges from construction activity, GP-02-01, as amended or revised. These activities include construction projects resulting in land disturbance of one or more acres. Such activities include but are not limited to clearing and grubbing, grading, excavating, and demolition.
- 2.4 **Department.** The New York State Department of Environmental Conservation.
- 2.5 **Design professional.** New York State licensed professional engineer or registered landscape architect.
- 2.6 **Hazardous Materials.** Any material, including any substance, waste, or combination thereof, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may cause, or significantly contribute to, a substantial present or potential hazard to human health, safety, property, or the environment when improperly treated, stored, transported, disposed of, or otherwise managed.
- 2.7 **Illicit Connections.** Any drain or conveyance, whether on the surface or subsurface, which allows an illegal discharge to enter the MS4, including but not limited to:
 1. Any conveyances which allow any non-stormwater discharge including treated or untreated sewage, process wastewater, and wash water to enter the MS4 and any connections to the storm drain system from indoor drains and sinks, regardless of whether said drain or connection had been previously allowed, permitted, or approved by an authorized enforcement agency; or
 2. Any drain or conveyance connected from a commercial or industrial land use to the MS4 which has not been documented in plans, maps, or equivalent records and approved by an authorized enforcement agency.
- 2.8 **Illicit Discharge.** Any direct or indirect non-stormwater discharge to the MS4, except as exempted in Section 6 of this law.
- 2.9 **Industrial Activity.** Activities requiring the SPDES permit for discharges from industrial activities except construction, GP-98-03, as amended or revised.
- 2.10 **MS4.** Municipal Separate Storm Sewer System.

- 2.11 **Municipal Separate Storm Sewer System.** A conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains):
1. Owned or operated by the Town of Bethlehem;
 2. Designed or used for collecting or conveying stormwater;
 3. Which is not a combined sewer; and
 4. Which is not part of a Publicly Owned Treatment Works (POTW) as defined at 40CFR 122.2
- 2.12 **Municipality.** The Town of Bethlehem
- 2.13 **Non-Stormwater Discharge.** Any discharge to the MS4 that is not composed entirely of stormwater.
- 2.14 **Person.** Any individual, association, organization, partnership, firm, corporation or other entity recognized by law and acting as either the owner or as the owner's agent.
- 2.15 **Pollutant.** Dredged spoil, filter backwash, solid waste, incinerator residue, treated or untreated sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand and industrial, municipal, agricultural waste and ballast discharged into water; which may cause or might reasonably be expected to cause pollution of the waters of the state in contravention of the standards.
- 2.16 **Premises.** Any building, lot, parcel of land, or portion of land whether improved or unimproved including adjacent sidewalks and parking strips.
- 2.17 **Special Conditions.**
1. **Discharge Compliance with Water Quality Standards.** The condition that applies where a municipality has been notified that the discharge of stormwater authorized under their MS4 permit may have caused or has the reasonable potential to cause or contribute to the violation of an applicable water quality standard. Under this condition the municipality must take all necessary actions to ensure future discharges do not cause or contribute to a violation of water quality standards.
 2. **303(d) Listed Waters.** The condition in the municipality's MS4 permit that applies where the MS4 discharges to a 303(d) listed water. Under this condition the stormwater management program must ensure no increase of the listed pollutant of concern to the 303(d) listed water.
 3. **Total Maximum Daily Load (TMDL) Strategy.** The condition in the municipality's MS4 permit where a TMDL including requirements for control of stormwater discharges has been approved by EPA for a waterbody or watershed into which the MS4 discharges. If the discharge from the MS4 did not meet the TMDL stormwater allocations prior to September 10, 2003, the municipality was required to modify its stormwater management program to ensure that reduction of the pollutant of concern specified in the TMDL is achieved.
 4. The condition in the municipality's MS4 permit that applies if a TMDL is approved in the future by EPA for any waterbody or watershed into which an MS4 discharges. Under this condition the municipality must review the applicable TMDL to see if it includes requirements for control of stormwater discharges. If an MS4 is not meeting the TMDL stormwater allocations, the municipality must, within six (6) months of the TMDL's approval, modify its stormwater management program to ensure that reduction of the pollutant of concern specified in the TMDL is achieved.
- 2.18 **State Pollutant Discharge Elimination System (SPDES) Stormwater Discharge Permit.** A permit issued by the Department that authorizes the discharge of pollutants to waters of the state.

- 2.19 Stormwater. Rainwater, surface runoff, snowmelt and drainage.
- 2.20 Stormwater Management Officer (SMO). The Town engineer or his / her designee shall enforce this local law. The SMO may also be designated by the municipality to accept and review stormwater pollution prevention plans, forward the plans to the applicable municipal board and inspect stormwater management practices.
- 2.21 303(d) List. A list of all surface waters in the state for which beneficial uses of the water (drinking, recreation, aquatic habitat, and industrial use) are impaired by pollutants, prepared periodically by the Department as required by Section 303(d) of the Clean Water Act. 303(d) listed waters are estuaries, lakes and streams that fall short of state surface water quality standards and are not expected to improve within the next two years.
- 2.22 TMDL. Total Maximum Daily Load.
- 2.23 Total Maximum Daily Load. The maximum amount of a pollutant to be allowed to be released into a waterbody so as not to impair uses of the water, allocated among the sources of that pollutant.
- 2.24 Wastewater. Water that is not stormwater, is contaminated with pollutants and is or will be discarded.

Section 3. Applicability.

This law shall apply to all water entering the MS4 generated on any developed and undeveloped lands unless explicitly exempted by an authorized enforcement agency.

Section 4. Responsibility For Administration.

The Stormwater Management Officer(s) (SMO(s)) shall administer, implement, and enforce the provisions of this law. Such powers granted or duties imposed upon the authorized enforcement official may be delegated in writing by the SMO as may be authorized by the municipality.

Section 5. Severability.

The provisions of this law are hereby declared to be severable. If any provision, clause, sentence, or paragraph of this law or the application thereof to any person, establishment, or circumstances shall be held invalid, such invalidity shall not affect the other provisions or application of this law.

Section 6. Adoption Of Law.

This law shall be in full force and effect on 1 January 2008. All prior laws and parts of law in conflict with this law are hereby repealed.

PASSED AND ADOPTED this 14th day of November, 2007, by the following vote:

5 Ayes, 0 Noes, 0 Absent.

Article 2 – Prohibited Activities

Section 1. Discharge Prohibitions.

- 1.1 Prohibition of Illegal Discharges.

No person shall discharge or cause to be discharged into the MS4 any materials other than stormwater except as provided in Section 1.1.1. The commencement, conduct or continuance of any illegal discharge to the MS4 is prohibited except as described as follows:

- 1.1.1 The following discharges are exempt from discharge prohibitions established by this local law, unless the Department or the municipality has determined them to be substantial contributors of pollutants: water line flushing or other potable water sources, (water line flushing of superchlorinated water used to disinfect water mains shall be dechlorinated), landscape irrigation or lawn watering, existing diverted stream flows, rising ground water, uncontaminated ground water infiltration to storm drains, uncontaminated pumped ground water, foundation or footing drains, crawl space or basement sump pumps, air conditioning condensate, irrigation water, springs, water from individual residential car washing, natural riparian habitat or wetland flows, dechlorinated swimming pool discharges, residential street wash water, water from fire fighting activities, and any other water source not containing pollutants. Such exempt discharges shall be made in accordance with an appropriate plan for reducing pollutants.
 - 1.1.2 Discharges approved in writing by the SMO to protect life or property from imminent harm or damage, provided that, such approval shall not be construed to constitute compliance with other applicable laws and requirements, and further provided that such discharges may be permitted for a specified time period and under such conditions as the SMO may deem appropriate to protect such life and property while reasonably maintaining the purpose and intent of this local law.
 - 1.1.3 Dye testing in compliance with applicable state and local laws is an allowable discharge, but requires a verbal notification to the SMO prior to the time of the test.
 - 1.1.4 The prohibition shall not apply to any discharge permitted under an SPDES permit, waiver, or waste discharge order issued to the discharger and administered under the authority of the Department, provided that the discharger is in full compliance with all requirements of the permit, waiver, or order and other applicable laws and regulations, and provided that written approval has been granted for any discharge to the MS4.
- 1.2 Prohibition of Illicit Connections.
- 1.2.1 The construction, use, maintenance or continued existence of illicit connections to the MS4 is prohibited.
 - 1.2.2 This prohibition expressly includes, without limitation, illicit connections made in the past, regardless of whether the connection was permissible under law or practices applicable or prevailing at the time of connection.
 - 1.2.3 A person is considered to be in violation of this local law if the person connects a line conveying sewage to the municipality's MS4, or allows such a connection to continue.

Section 2. Prohibition Against Activities Contaminating Stormwater

- 2.1 Activities that are subject to the requirements of this section are those types of activities that:
 - 2.1.1 Cause or contribute to a violation of the municipality's MS4 SPDES permit.
 - 2.1.2 Cause or contribute to the municipality being subject to the Special Conditions as defined in Article 1 - Section 2 (Definitions) of this local law.
- 2.3 Upon notification to a person that he or she is engaged in activities that cause or contribute to violations of the municipality's MS4 SPDES permit authorization, that person shall take all reasonable actions to correct

such activities such that he or she no longer causes or contributes to violations of the municipality's MS4 SPDES permit authorization.

Article 3 – Discharges And Access To MS4

Section 1. Requirement To Prevent, Control, And Reduce Stormwater Pollutants By The Use Of Best Management Practices.

1.1 Best Management Practices

Where the SMO has identified illicit discharges as defined in Article 1 - Section 2 or activities contaminating stormwater as defined in Article 2 - Section 2 the municipality may require implementation of Best Management Practices (BMPs) to control those illicit discharges and activities.

- 1.1.1 The owner or operator of a commercial or industrial establishment shall provide, at their own expense, reasonable protection from accidental discharge of prohibited materials or other wastes into the MS4 through the use of structural and non-structural BMPs.
- 1.1.2 Any person responsible for a property or premise, which is, or may be, the source of an illicit discharge as defined in Article 1 - Section 2 or an activity contaminating stormwater as defined in Article 2 - Section 2, may be required to implement, at said person's expense, additional structural and non-structural BMPs to reduce or eliminate the source of pollutant(s) to the MS4.
- 1.1.3 Compliance with all terms and conditions of a valid SPDES permit authorizing the discharge of stormwater associated with industrial activity, to the extent practicable, shall be deemed compliance with the provisions of this section.

Section 2. Suspension Of Access To MS4. Illicit Discharges in Emergency Situations.

- 2.1 The SMO may, without prior notice, suspend MS4 discharge access to a person when such suspension is necessary to stop an actual or threatened discharge which presents or may present imminent and substantial danger to the environment, to the health or welfare of persons, or to the MS4. The SMO shall notify the person of such suspension within a reasonable time thereafter in writing of the reasons for the suspension. If the violator fails to comply with a suspension order issued in an emergency, the SMO may take such steps as deemed necessary to prevent or minimize damage to the MS4 or to minimize danger to persons.
- 2.2 Suspension due to the detection of illicit discharge. Any person discharging to the municipality's MS4 in violation of this law may have their MS4 access terminated if such termination would abate or reduce an illicit discharge. The SMO will notify a violator in writing of the proposed termination of its MS4 access and the reasons therefor. The violator may petition the SMO for a reconsideration and hearing. Access may be granted by the SMO if he/she finds that the illicit discharge has ceased and the discharger has taken steps to prevent its recurrence. Access may be denied if the SMO determines in writing that the illicit discharge has not ceased or is likely to recur. A person commits an offense if the person reinstates MS4 access to premises terminated pursuant to this Section, without the prior approval of the SMO.

Section 3. Industrial Or Construction Activity Discharges.

Any person subject to an industrial or construction activity SPDES stormwater discharge permit shall comply with all provisions of such permit. Proof of compliance with said permit may be required in a form acceptable to the municipality prior to the allowing of discharges to the MS4.

Section 4. Access And Monitoring Of Discharges.

- 4.1 Applicability. This section applies to all facilities that the SMO must inspect to enforce any provision of this Law, or whenever the authorized enforcement agency has cause to believe that there exists, or potentially exists, in or upon any premises any condition which constitutes a violation of this Law.
- 4.2 Access to Facilities.
- 4.2.1 The SMO shall be permitted to enter and inspect facilities subject to regulation under this law as often as may be necessary to determine compliance with this Law. If a discharger has security measures in force, which require proper identification and clearance before entry into its premises, the discharger shall make the necessary arrangements to allow access to the SMO.
- 4.2.2 Facility operators shall allow the SMO ready access to all parts of the premises for the purposes of inspection, sampling, examination and copying of records as may be required to implement this law.
- 4.2.3 The municipality shall have the right to set up on any facility subject to this law such devices as are necessary in the opinion of the SMO to conduct monitoring and/or sampling of the facility's stormwater discharge.
- 4.2.4 The municipality has the right to require the facilities subject to this law to install monitoring equipment as is reasonably necessary to determine compliance with this law. The facility's sampling and monitoring equipment shall be maintained at all times in a safe and proper operating condition by the discharger at its own expense. All devices used to measure stormwater flow and quality shall be calibrated to ensure their accuracy.
- 4.2.5 Unreasonable delays in allowing the municipality access to a facility subject to this law is a violation of this law. A person who is the operator of a facility subject to this law commits an offense if the person denies the municipality reasonable access to the facility for the purpose of conducting any activity authorized or required by this law.
- 4.2.6 If the SMO has been refused access to any part of the premises from which stormwater is discharged, and he/she is able to demonstrate probable cause to believe that there may be a violation of this law, or that there is a need to inspect and/or sample as part of a routine inspection and sampling program designed to verify compliance with this law or any order issued hereunder, then the SMO may seek issuance of a search warrant from any court of competent jurisdiction.

Section 5. Notification Of Spills.

Notwithstanding other requirements of law, as soon as any person responsible for a facility or operation, or responsible for emergency response for a facility or operation has information of any known or suspected release of materials which are resulting or may result in illegal discharges or pollutants discharging into the MS4, said person shall take all necessary steps to ensure the discovery, containment, and cleanup of such release. In the event of such a release of hazardous materials said person shall immediately notify emergency response agencies of the occurrence via emergency dispatch services. In the event of a release of non-hazardous materials, said person shall notify the municipality in person or by telephone or facsimile no later than the next business day. Notifications in person or by telephone shall be confirmed by written notice addressed and mailed to the municipality within three business days of the telephone notice. If the discharge of prohibited materials emanates from a commercial or industrial establishment, the owner or operator of such establishment shall also retain an on-site written record of the discharge and the actions taken to prevent its recurrence. Such records shall be retained for at least three years.

Article 5 – Administration And Enforcement

Section 1. Enforcement.

1.1 Notice of Violation.

When the municipality's SMO finds that a person has violated a prohibition or failed to meet a requirement of this law, he/she may order compliance by written notice of violation to the responsible person. Such notice may require without limitation:

1.1.1 The elimination of illicit connections or discharges;

1.1.2 That violating discharges, practices, or operations shall cease and desist;

1.1.3 The abatement or remediation of stormwater pollution or contamination hazards and the restoration of any affected property;

1.1.4 The performance of monitoring, analyses, and reporting;

1.1.5 Payment of a fine; and

1.1.6 The implementation of source control or treatment BMPs. If abatement of a violation and/or restoration of affected property is required, the notice shall set forth a deadline within which such remediation or restoration must be completed. Said notice shall further advise that, should the violator fail to remediate or restore within the established deadline, the work will be done by a designated governmental agency or a contractor and the expense thereof shall be charged to the violator.

1.2 Penalties

In addition to or as an alternative to any penalty provided herein or by law, any person who violates the provisions of this local law shall be guilty of a violation punishable by a fine not exceeding three hundred fifty dollars (\$350) or imprisonment for a period not to exceed six months, or both for conviction of a first offense; for conviction of a second offense both of which were committed within a period of five years, punishable by a fine not less than three hundred fifty dollars nor more than seven hundred dollars (\$700) or imprisonment for a period not to exceed six months, or both; and upon conviction for a third or subsequent offense all of which were committed within a period of five years, punishable by a fine not less than seven hundred dollars nor more than one thousand dollars (\$1000) or imprisonment for a period not to exceed six months, or both. However, for the purposes of conferring jurisdiction upon courts and judicial officers generally, violations of this local law shall be deemed misdemeanors and for such purpose only all provisions of law relating to misdemeanors shall apply to such violations. Each week's continued violation shall constitute a separate additional violation.

Section 2. Appeal Of Notice Of Violation.

Any person receiving a Notice of Violation may appeal the determination of the SMO to the Town Board within 15 days of its issuance, which shall hear the appeal within 30 days after the filing of the appeal, and within five days of making its decision, file its decision in the office of the municipal clerk and mail a copy of its decision by certified mail to the discharger.

Section 3. Corrective Measures After Appeal.

3.1 If the violation has not been corrected pursuant to the requirements set forth in the Notice of Violation, or, in the event of an appeal, within 5 business days of the decision of the municipal authority upholding the decision of the SMO, then the SMO shall request the owner's permission for access to the subject private

property to take any and all measures reasonably necessary to abate the violation and/or restore the property.

- 3.2 If refused access to the subject private property, the SMO may seek a warrant in a court of competent jurisdiction to be authorized to enter upon the property to determine whether a violation has occurred. Upon determination that a violation has occurred, the SMO may seek a court order to take any and all measures reasonably necessary to abate the violation and/or restore the property. The cost of implementing and maintaining such measures shall be the sole responsibility of the discharger.

Section 4. Injunctive Relief.

It shall be unlawful for any person to violate any provision or fail to comply with any of the requirements of this law. If a person has violated or continues to violate the provisions of this law, the SMO may petition for a preliminary or permanent injunction restraining the person from activities which would create further violations or compelling the person to perform abatement or remediation of the violation.

Section 5. Alternative Remedies.

- 5.1 Where a person has violated a provision of this Law, he/she may be eligible for alternative remedies in lieu of a civil penalty, upon recommendation of the Municipal Attorney and concurrence of the Municipal Code Enforcement Officer, where:

- 5.1.1 The violation was unintentional
- 5.1.2 The violator has no history of previous violations of this Law.
- 5.1.3 Environmental damage was minimal.
- 5.1.4 Violator acted quickly to remedy violation.
- 5.1.5 Violator cooperated in investigation and resolution.

- 5.2 Alternative remedies may consist of one or more of the following:

- 5.2.1 Attendance at compliance workshops
- 5.2.2 Storm drain stenciling or storm drain marking
- 5.2.3 River, stream or creek cleanup activities

Section 6. Violations Deemed A Public Nuisance.

In addition to the enforcement processes and penalties provided, any condition caused or permitted to exist in violation of any of the provisions of this law is a threat to public health, safety, and welfare, and is declared and deemed a nuisance, and may be summarily abated or restored at the violator's expense, and/or a civil action to abate, enjoin, or otherwise compel the cessation of such nuisance may be taken.

Section 7. Remedies Not Exclusive.

The remedies listed in this law are not exclusive of any other remedies available under any applicable federal, state or local law and it is within the discretion of the authorized enforcement agency to seek cumulative remedies.

STORMWATER MANAGEMENT LOCAL LAW
SECTION TWO
Stormwater Management and
Erosion & Sediment Control

Article 1. General Provisions

Section 1. Findings of Fact

It is hereby determined that:

1. Land development activities and associated increases in site impervious cover often alter the hydrologic response of local watersheds and increase stormwater runoff rates and volumes, flooding, stream channel erosion, or sediment transport and deposition;
2. This stormwater runoff contributes to increased quantities of water-borne pollutants, including siltation of aquatic habitat for fish and other desirable species;
3. Clearing and grading during construction tends to increase soil erosion and add to the loss of native vegetation necessary for terrestrial and aquatic habitat;
4. Improper design and construction of stormwater management practices can increase the velocity of stormwater runoff thereby increasing stream bank erosion and sedimentation;
5. Impervious surfaces allow less water to percolate into the soil, thereby decreasing groundwater recharge and stream baseflow;
6. Substantial economic losses can result from these adverse impacts on the waters of the municipality;
7. Stormwater runoff, soil erosion and nonpoint source pollution can be controlled and minimized through the regulation of stormwater runoff from land development activities;
8. The regulation of stormwater runoff discharges from land development activities in order to control and minimize increases in stormwater runoff rates and volumes, soil erosion, stream channel erosion, and nonpoint source pollution associated with stormwater runoff is in the public interest and will minimize threats to public health and safety.
9. Regulation of land development activities by means of performance standards governing stormwater management and site design will produce development compatible with the natural functions of a particular site or an entire watershed and thereby mitigate the adverse effects of erosion and sedimentation from development.

Section 2. Purpose

The purpose of this local law is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in Section 1 hereof. This local law seeks to meet those purposes by achieving the following objectives:

- 2.1 Meet the requirements of minimum measures 4 and 5 of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit no. GP-02-02 or as amended or revised;
- 2.2 Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities GP-02-01 or as amended or revised;
- 2.3 Minimize increases in stormwater runoff from land development activities in order to reduce flooding,

- siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;
- 2.4 Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;
 - 2.5 Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and
 - 2.6 Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.

Section 3. Statutory Authority

In accordance with Article 10 of the Municipal Home Rule Law of the State of New York, the Town Board of Bethlehem has the authority to enact local laws and amend local laws and for the purpose of promoting the health, safety or general welfare of the Town of Bethlehem and for the protection and enhancement of its physical environment. The Town Board of Bethlehem may include in any such local law provisions for the appointment of any municipal officer, employees, or independent contractor to effectuate, administer and enforce such local law.

Section 4. Applicability

- 4.1 This local law shall be applicable to all land development activities as defined in this local law, Article 2, Section 1.
- 4.2 The municipality shall designate a Stormwater Management Officer who shall accept and review all stormwater pollution prevention plans and forward such plans to the applicable municipal board. The Stormwater Management Officer may (1) review the plans, (2) engage the services of a licensed professional engineer or registered landscape architect to review the plans, specifications and related documents at a cost not to exceed a fee schedule established by said governing board, or (3) accept the certification of a licensed professional engineer or registered landscape architect that the plans conform to the requirements of this law.
- 4.3 All land development activities subject to review and approval by the (applicable board of the Town of Bethlehem under (subdivision, site plan, and/or special permit) regulations shall be reviewed subject to the standards contained in this local law
- 4.4 All land development activities not subject to review as stated in section 4.3 shall be required to submit a Stormwater Pollution Prevention Plan (SWPPP) to the Stormwater Management Officer who shall approve the SWPPP if it complies with the requirements of this law

Section 5. Exemptions

The following activities may be exempt from review under this law.

- 5.1 Agricultural activity as defined in this local law.
- 5.2 Silvicultural activity except that landing areas and log haul roads are subject to this law.
- 5.3 Routine maintenance activities that disturb less than five acres and are performed to maintain the original line and grade, hydraulic capacity or original purpose of a facility.
- 5.4 Repairs to any stormwater management practice or facility deemed necessary by the Stormwater Management Officer.
- 5.5 Any part of a subdivision if a plat for the subdivision has been approved by the Town of Bethlehem on or

before the effective date of this law.

- 5.6 Land development activities for which a building permit has been approved on or before the effective date of this law.
- 5.7 Cemetery graves.
- 5.8 Installation of fence, sign, telephone, and electric poles and other kinds of posts or poles.
- 5.9 Emergency activity immediately necessary to protect life, property or natural resources.
- 5.10 Activities of an individual engaging in home gardening by growing flowers, vegetable and other plants primarily for use by that person and his or her family.

Article 2. Stormwater Control

Section 1. Definitions

The terms used in this local law or in documents prepared or reviewed under this local law shall have the meaning as set forth in this section.

Agricultural Activity - the activity of an active farm including grazing and watering livestock, irrigating crops, harvesting crops, using land for growing agricultural products, and cutting timber for sale, but shall not include the operation of a dude ranch or similar operation, or the construction of new structures associated with agricultural activities.

Applicant - a property owner or agent of a property owner who has filed an application for a land development activity.

Building - any structure, either temporary or permanent, having walls or supported by columns and a roof, designed for the shelter of any person, animal, or property
Channel - a natural or artificial watercourse with a definite bed and banks that conducts continuously or periodically flowing water.

Clearing - any activity that removes the vegetative surface cover.

Dedication - the deliberate appropriation of property by its owner for general public use.

Department - the New York State Department of Environmental Conservation

Design Manual - the *New York State Stormwater Management Design Manual*, most recent version including applicable updates, that serves as the official guide for stormwater management principles, methods and practices.

Developer - a person who undertakes land development activities.

Erosion Control Manual - the most recent version of the "New York Standards and Specifications for Erosion and Sediment Control" manual, commonly known as the "Blue Book".

Grading - excavation or fill of material, including the resulting conditions thereof.

Impervious Cover - those surfaces, improvements and structures that cannot effectively infiltrate rainfall, snow melt and water (e.g., building rooftops, pavement, sidewalks, driveways, etc).

Industrial Stormwater Permit - a State Pollutant Discharge Elimination System permit issued to a commercial industry or group of industries which regulates the pollutant levels associated with industrial stormwater discharges or specifies on-site pollution control strategies.

Infiltration - the process of percolating stormwater into the subsoil.

Jurisdictional Wetland - an area that is inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support a prevalence of vegetation typically adapted for life in saturated soil conditions, commonly known as hydrophytic vegetation.

Land Development Activity - construction activity including clearing, grading, excavating, soil disturbance or placement of fill that results in:

1. Land disturbance of equal to or greater than one acre
2. Activities disturbing less than one acre of total land area that is part of a larger common plan of development or sale, even though multiple separate and distinct land development activities may take place at different times on different schedules.

Landowner - the legal or beneficial owner of land, including those holding the right to purchase or lease the land, or

any other person holding proprietary rights in the land.

Maintenance Agreement - a legally recorded document that acts as a property deed restriction, and which provides for long-term maintenance of stormwater management practices.

Nonpoint Source Pollution - pollution from any source other than from any discernible, confined, and discrete conveyances, and shall include, but not be limited to, pollutants from agricultural, silvicultural, mining, construction, subsurface disposal and urban runoff sources.

Phasing - clearing a parcel of land in distinct pieces or parts, with the stabilization of each piece completed before the clearing of the next.

Pollutant of Concern - sediment or a water quality measurement that addresses sediment (such as total suspended solids, turbidity or siltation) and any other pollutant that has been identified as a cause of impairment of any water body that will receive a discharge from the land development activity.

Project - land development activity

Recharge - the replenishment of underground water reserves.

Sediment Control - measures that prevent eroded sediment from leaving the site.

Sensitive Areas - cold water fisheries, shellfish beds, swimming beaches, groundwater recharge areas, water supply reservoirs, habitats for threatened, endangered or special concern species.

SPDES General Permit for Construction Activities GP-02-01 - A permit under the New York State Pollutant Discharge Elimination System (SPDES) issued to developers of construction activities to regulate disturbance of one or more acres of land.

SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems GP-02-02 - A permit under the New York State Pollutant Discharge Elimination System (SPDES) issued to municipalities to regulate discharges from municipal separate storm sewers for compliance with EPA established water quality standards and/or to specify stormwater control standards

Stabilization - the use of practices that prevent exposed soil from eroding.

Stop Work Order - an order issued which requires that all construction activity on a site be stopped.

Stormwater - rainwater, surface runoff, snowmelt and drainage

Stormwater Hotspot - a land use or activity that generates higher concentrations of hydrocarbons, trace metals or toxicants than are found in typical stormwater runoff, based on monitoring studies.

Stormwater Management - the use of structural or non-structural practices that are designed to reduce stormwater runoff and mitigate its adverse impacts on property, natural resources and the environment.

Stormwater Management Facility - one or a series of stormwater management practices installed, stabilized and operating for the purpose of controlling stormwater runoff.

Stormwater Management Officer (SMO) - an employee or officer designated by the Town Board to accept and review stormwater pollution prevention plans, forward the plans to the applicable municipal board and inspect stormwater management practices. The Town Engineer or his / her designee is hereby designated to be the SMO

Stormwater Management Practices (SMPs) - measures, either structural or nonstructural, that are determined to be the most effective, practical means of preventing flood damage and preventing or reducing point source or nonpoint source pollution inputs to stormwater runoff and water bodies.

Stormwater Pollution Prevention Plan (SWPPP) - a plan for controlling stormwater runoff and pollutants from a site during and after construction activities.

Stormwater Runoff - flow on the surface of the ground, resulting from precipitation

Surface Waters of the State of New York - lakes, bays, sounds, ponds, impounding reservoirs, springs, wells, rivers, streams, creeks, estuaries, marshes, inlets, canals, the Atlantic ocean within the territorial seas of the state of New York and all other bodies of surface water, natural or artificial, inland or coastal, fresh or salt, public or private (except those private waters that do not combine or effect a junction with natural surface or underground waters), which are wholly or partially within or bordering the state or within its jurisdiction.

Storm sewers and waste treatment systems, including treatment ponds or lagoons which also meet the criteria of this definition are not waters of the state. This exclusion applies only to manmade bodies of water which neither were originally created in waters of the state (such as a disposal area in wetlands) nor resulted from impoundment of waters of the state.

Watercourse - a permanent or intermittent stream or other body of water, either natural or man-made, which gathers or carries surface water.

Waterway - a channel that directs surface runoff to a watercourse or to the public storm drain.

Section 2. Stormwater Pollution Prevention Plans

2.1. Stormwater Pollution Prevention Plan Requirement

No application for approval of a land development activity shall be approved until the appropriate board has accepted a Stormwater Pollution Prevention Plan (SWPPP) prepared in accordance with the specifications in this local law.

2.2 Contents of Stormwater Pollution Prevention Plans

- 2.2.1** All SWPPPs shall provide the following background information and erosion and sediment controls:
1. Background information about the scope of the project, including location, type and size of project.
 2. Site map/construction drawing(s) for the project, including a general location map. At a minimum, the site map should show the total site area; all improvements; areas of disturbance; areas that will not be disturbed; existing vegetation; on-site and adjacent off-site surface water(s); wetlands and drainage patterns that could be affected by the construction activity; existing and final slopes; locations of off-site material, waste, borrow or equipment storage areas; and location(s) of the stormwater discharges(s); Site map shall be at a scale as determined by the SMO.
 3. Description of the soil(s) present at the site;
 4. Construction phasing plan describing the intended sequence of construction activities, including clearing and grubbing, excavation and grading, utility and infrastructure installation and any other activity at the site that results in soil disturbance. Consistent with the New York Standards and Specifications for Erosion and Sediment Control (Erosion Control Manual), not more than five (5) acres shall be disturbed at any one time unless pursuant to an approved SWPPP.
 5. Description of the pollution prevention measures that will be used to control litter, construction chemicals and construction debris from becoming a pollutant source in stormwater runoff;
 6. Description of construction and waste materials expected to be stored on-site with updates as appropriate, and a description of controls to reduce pollutants from these materials including storage practices to minimize exposure of the materials to stormwater, and spill prevention and response;
 7. Temporary and permanent structural and vegetative measures to be used for soil stabilization, runoff control and sediment control for each stage of the project from initial land clearing and grubbing to project close-out;
 8. A site map/construction drawing(s) specifying the location(s), size(s) and length(s) of each erosion and sediment control practice;
 9. Dimensions, material specifications and installation details for all erosion and sediment control practices, including the siting and sizing of any temporary sediment basins;
 10. Temporary practices that will be converted to permanent control measures;
 11. Implementation schedule for staging temporary erosion and sediment control practices, including the timing of initial placement and duration that each practice should remain in place;
 12. Maintenance schedule to ensure continuous and effective operation of the erosion and sediment control practice;
 13. Name(s) of the receiving water(s);
 14. Delineation of SWPPP implementation responsibilities for each part of the site;

15. Description of structural practices designed to divert flows from exposed soils, store flows, or otherwise limit runoff and the discharge of pollutants from exposed areas of the site to the degree attainable; and

16. Any existing data that describes the stormwater runoff at the site.

2.2.2 Land development activities as defined in Section 1 of this Article and meeting Condition "A", "B" or "C" below shall also include water quantity and water quality controls (post-construction stormwater runoff controls) as set forth in Section 2.2.3 below as applicable:

Condition A - Stormwater runoff from land development activities discharging a pollutant of concern to either an impaired water identified on the Department's 303(d) list of impaired waters or a Total Maximum Daily Load (TMDL) designated watershed for which pollutants in stormwater have been identified as a source of the impairment.

Condition B - Stormwater runoff from land development activities disturbing five (5) or more acres.

Condition C - Stormwater runoff from land development activity disturbing between one (1) and five (5) acres of land during the course of the project, exclusive of the construction of single family residences and construction activities at agricultural properties.

2.2.3 SWPPP Requirements for Condition A, B and C:

1. All information in Section 2.2.1 of this local law
2. Description of each post-construction stormwater management practice;
3. Site map/construction drawing(s) showing the specific location(s) and size(s) of each post-construction stormwater management practice;
4. Hydrologic and hydraulic analysis for all structural components of the stormwater management system for the applicable design storms
5. Comparison of post-development stormwater runoff conditions with pre-development conditions
6. Dimensions, material specifications and installation details for each post-construction stormwater management practice;
7. Maintenance schedule to ensure continuous and effective operation of each post-construction stormwater management practice.
8. Maintenance easements to ensure access to all stormwater management practices at the site for the purpose of inspection and repair. Easements shall be recorded on the plan and shall remain in effect with transfer of title to the property.
9. Inspection and maintenance agreement binding on all subsequent landowners served by the on-site stormwater management measures in accordance with Article 2, Section 4 of this local law.

2.3 Plan Certification

The SWPPP shall be prepared by a registered landscape architect or licensed professional engineer and must be signed by the professional preparing the plan, who shall certify that the design of all stormwater management practices meet the requirements in this local law.

2.4 Other Environmental Permits

The applicant shall assure that all other applicable environmental permits have been or will be acquired for the land development activity prior to approval of the final stormwater design plan.

2.5 Contractor Certification

- 2.5.1 Each contractor and subcontractor who will be involved in soil disturbance and/or stormwater management practice installation identified in the SWPPP shall sign and date a copy of the following certification statement before undertaking any land development activity: "I certify under penalty of law that I understand and agree to comply with the terms and conditions of the Stormwater Pollution Prevention Plan. I also understand that it is unlawful for any person to cause or contribute to a violation of water quality standards." 2.5.2 The certification must include the name and title of the person providing the signature, address and telephone number of the contracting firm; the address (or other identifying description) of the site; and the date the certification is made.
- 2.5.3 The certification statement(s) shall become part of the SWPPP for the land development activity.
- 2.6 A copy of the SWPPP shall be retained at the site of the land development activity during construction from the date of initiation of construction activities to the date of final stabilization.

Section 3. Performance and Design Criteria for Stormwater Management and Erosion and Sediment Control

All land development activities shall be subject to the following performance and design criteria:

3.1 Technical Standards

For the purpose of this local law, the following documents shall serve as the official guides and specifications for stormwater management. Stormwater management practices that are designed and to meet the most restrictive of the following technical documents, as determined by the SMO, shall be presumed to meet the standards imposed by this law:

- 3.1.1 The New York State Stormwater Management Design Manual (New York State Department of Environmental Conservation, most current version or its successor, hereafter referred to as the Design Manual)
- 3.1.2 New York Standards and Specifications for Erosion and Sediment Control, (Empire State Chapter of the Soil and Water Conservation Society, 2004, most current version or its successor, hereafter referred to as the Erosion Control Manual).
- 3.1.3 Town of Bethlehem Standard Specifications and Details

3.2 Water Quality Standards

- 3.2.1 Any land development activity shall not cause an increase in turbidity that will result in substantial visible contrast to natural conditions in surface waters of the state of New York.

Section 4. Maintenance and Repair of Stormwater Facilities

4.1 Maintenance During Construction

- 4.1.1 The applicant or developer of the land development activity shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the applicant or developer to achieve compliance with the conditions of this local law. Sediment shall be removed from sediment traps or sediment ponds whenever their design capacity has been reduced by fifty (50) percent
- 4.1.2 The applicant or developer or their representative shall be on site at all times when construction or grading activity takes place and shall inspect and document the effectiveness of all erosion and sediment control practices. Timing of Inspections shall be in accordance with current NYSDEC

requirements The reports shall be delivered to the Stormwater Management Officer and also copied to the site log book.

4.2 Maintenance Easement(s)

Prior to the issuance of any approval that has a stormwater management facility as one of the requirements, the applicant or developer must execute a maintenance easement agreement that shall be binding on all subsequent landowners served by the stormwater management facility. The easement shall provide for access to the facility at reasonable times for periodic inspection by the Town of Bethlehem to ensure that the facility is maintained in proper working condition to meet design standards and any other provisions established by this local law. The easement shall be recorded by the grantor in the office of the County Clerk after approval by the counsel for the Town of Bethlehem.

4.3 Maintenance after Construction

The owner or operator of permanent stormwater management practices installed in accordance with this law shall be operated and maintained to achieve the goals of this law. Proper operation and maintenance also includes as a minimum, the following:

- 4.3.1 A preventive/corrective maintenance program for all critical facilities and systems of treatment and control (or related appurtenances) which are installed or used by the owner or operator to achieve the goals of this law.
- 4.3.2 Written procedures for operation and maintenance and training new maintenance personnel.
- 4.3.3 Discharges from the SMPs shall not exceed design criteria or cause or contribute to water quality standard violations in accordance with Article 2, section 3.2.

4.4 Maintenance Agreements

The Town of Bethlehem shall approve a formal maintenance agreement for stormwater management facilities binding on all subsequent landowners and recorded in the office of the County Clerk as a deed restriction on the property prior to final plan approval. The maintenance agreement shall be consistent with the terms and conditions of Schedule B of this local law entitled Sample Stormwater Control Facility Maintenance Agreement. The Town of Bethlehem, in lieu of a maintenance agreement, at its sole discretion may accept dedication of any existing or future stormwater management facility, provided such facility meets all the requirements of this local law and includes adequate and perpetual access and sufficient area, by easement or otherwise, for inspection and regular maintenance.

Section 5. Severability and Effective Date

5.1 Severability

If the provisions of any article, section, subsection, paragraph, subdivision or clause of this local law shall be judged invalid by a court of competent jurisdiction, such order of judgment shall not affect or invalidate the remainder of any article, section, subsection, paragraph, subdivision or clause of this local law.

5.2 Effective Date

This Local Law shall take effect January 1, 2008 after filing with the office of the Secretary of State.

Approved by: Town Board Date November 14, 2007.

Article 3. Administration and Enforcement

Section 1. Inspections

1.1 Erosion and Sediment Control Inspections During Construction

The Town of Bethlehem Stormwater Management Officer may require such inspections as necessary to determine

compliance with this law and may either approve that portion of the work completed or notify the applicant wherein the work fails to comply with the requirements of this law and the stormwater pollution prevention plan (SWPPP) as approved. To obtain inspections, the applicant shall notify the Town of Bethlehem enforcement official at least 48 hours before any of the following as required by the Stormwater Management Officer:

- 1.1.1 Start of construction
- 1.1.2 Installation of sediment and erosion control measures
- 1.1.3 Completion of site clearing
- 1.1.4 Completion of rough grading
- 1.1.5 Completion of final grading
- 1.1.6 Close of the construction season or prior to a prolonged shutdown (exceeding 30 days)
- 1.1.7 Completion of final landscaping
- 1.1.8 Successful establishment of landscaping in public areas.

If any violations are found, the applicant and developer shall be notified in writing of the nature of the violation and the required corrective actions. No further work shall be conducted except for site stabilization until any violations are corrected, unless approved in writing by the stormwater management officer and all work previously completed has received approval by the Stormwater Management Officer.

1.2 Final Construction Stormwater Management Practice Inspections

The Town of Bethlehem Stormwater Management Officer, is responsible for conducting final construction inspections of stormwater management practices (SMPs). All applicants are required to submit "Record Drawing" plans for any stormwater management practices located on-site after final construction is completed. The plan must show the final design specifications for all stormwater management facilities and must be certified by a licensed professional engineer or registered landscape architect

1.3 Post Construction Inspection of Stormwater Facilities

Inspection programs shall be established on any reasonable basis, including but not limited to: routine inspections; random inspections; inspections based upon complaints or other notice of possible violations; inspection of drainage basins or areas identified as higher than typical sources of sediment or other contaminants or pollutants; inspections of businesses or industries of a type associated with higher than usual discharges of contaminants or pollutants or with discharges of a type which are more likely than the typical discharge to cause violations of state or federal water or sediment quality standards or the SPDES stormwater permit; and joint inspections with other agencies inspecting under environmental or safety laws. Inspections may include, but are not limited to: reviewing maintenance and repair records; sampling discharges, surface water, groundwater, and material or water in drainage control facilities; and evaluating the condition of drainage control facilities and other stormwater management practices.

1.4 Submission of Reports

The Town of Bethlehem Stormwater Management Officer may require monitoring and reporting from entities subject to this law as are necessary to determine compliance with this law.

1.5 Right-of-Entry for Inspection

When any new stormwater management facility is installed on private property or when any new connection is made between private property and the public storm water system, the landowner shall grant to the Town of Bethlehem the right to enter the property at reasonable times and in a reasonable manner for the purpose of inspection as specified in paragraph 1.3.

Section 2: Performance Guarantee

2.1 Construction Completion Guarantee

In order to ensure the full and faithful completion of all land development activities related to compliance with all conditions set forth by the Town of Bethlehem in its approval of the Stormwater Pollution Prevention Plan, the Town of Bethlehem may require the applicant or developer to provide, prior to construction, a performance bond, cash escrow, or irrevocable letter of credit from an appropriate financial or surety institution which guarantees satisfactory completion of the project and names the Town of Bethlehem as the beneficiary. The security shall be in an amount to be determined by the Town of Bethlehem based on submission of final design plans, with reference to actual construction and landscaping costs. The performance guarantee shall remain in force until the surety is released from liability by the Town of Bethlehem, provided that such period shall not be less than one year from the date of final acceptance or such other certification that the facility(ies) have been constructed in accordance with the approved plans and specifications and that a one year inspection has been conducted and the facilities have been found to be acceptable to the Town of Bethlehem. Per annum interest on cash escrow deposits shall be reinvested in the account until the surety is released from liability.

2.2 Maintenance Guarantee

Where stormwater management and erosion and sediment control facilities are to be operated and maintained by the developer or by a corporation that owns or manages a commercial or industrial facility, the developer, prior to construction, may be required to provide the Town of Bethlehem with an irrevocable letter of credit from an approved financial institution or surety to ensure proper operation and maintenance of all stormwater management and erosion control facilities both during and after construction, and until the facilities are removed from operation. If the developer or landowner fails to properly operate and maintain stormwater management and erosion and sediment control facilities, the Town of Bethlehem may draw upon the account to cover the costs of proper operation and maintenance, including engineering and inspection costs.

2.3 Record keeping

The Town of Bethlehem requires entities subject to this law to maintain records demonstrating compliance with this law. The Town of Bethlehem, at its discretion has the right to review owners records.

Section 3. Enforcement and Penalties

3.1 Notice of Violation.

When the Town of Bethlehem determines that a land development activity is not being carried out in accordance with the requirements of this local law, it may issue a written notice of violation to the landowner. The notice of violation shall contain :

- 3.1.1 the name and address of the landowner, developer or applicant;
- 3.1.2 the address when available or a description of the building, structure or land upon which the violation is occurring;
- 3.1.3 a statement specifying the nature of the violation;
- 3.1.4 a description of the remedial measures necessary to bring the land development activity into compliance with this local law and a time schedule for the completion of such remedial action;
- 3.1.5 a statement of the penalty or penalties that shall or may be assessed against the person to whom the notice of violation is directed;
- 3.1.6 a statement that the determination of violation may be appealed to the municipality by filing a written notice of appeal within fifteen (15) days of service of notice of violation.

3.2 Stop Work Orders

The Town of Bethlehem may issue a stop work order for violations of this law. Persons receiving a stop work order shall be required to halt all land development activities, except those activities that address the violations leading to the stop work order. The stop work order shall be in effect until the Town of Bethlehem confirms that

the land development activity is in compliance and the violation has been satisfactorily addressed. Failure to address a stop work order in a timely manner may result in civil, criminal, or monetary penalties in accordance with the enforcement measures authorized in this local law.

3.3 Violations

Any land development activity that is commenced or is conducted contrary to this local law, may be restrained by injunction or otherwise abated in a manner provided by law.

3.4 Penalties

In addition to or as an alternative to any penalty provided herein or by law, any person who violates the provisions of this local law shall be guilty of a violation punishable by a fine not exceeding three hundred fifty dollars (\$350) or imprisonment for a period not to exceed six months, or both for conviction of a first offense; for conviction of a second offense both of which were committed within a period of five years, punishable by a fine not less than three hundred fifty dollars nor more than seven hundred dollars (\$700) or imprisonment for a period not to exceed six months, or both; and upon conviction for a third or subsequent offense all of which were committed within a period of five years, punishable by a fine not less than seven hundred dollars nor more than one thousand dollars (\$1000) or imprisonment for a period not to exceed six months, or both. However, for the purposes of conferring jurisdiction upon courts and judicial officers generally, violations of this local law shall be deemed misdemeanors and for such purpose only all provisions of law relating to misdemeanors shall apply to such violations. Each week's continued violation shall constitute a separate additional violation.

3.5 Withholding of Certificate of Occupancy

If any building or land development activity is installed or conducted in violation of this local law the Stormwater Management Officer may prevent the occupancy of said building or land.

3.6 Restoration of lands

Any violator may be required to restore land to its undisturbed condition. In the event that restoration is not undertaken within a reasonable time after notice, the Town of Bethlehem may take necessary corrective action, the cost of which shall become a lien upon the property until paid.

Section 4. Fees for Services

The Town of Bethlehem may require any person undertaking land development activities regulated by this law to pay reasonable costs at prevailing rates for review of SWPPPs, inspections, or SMP maintenance performed by the Town of Bethlehem or performed by a third party for the Town of Bethlehem.

Town Code
Town of Bethlehem
Chapter 103

Subdivision Regulations Amendments

§103-20. Review of Land Divisions -

Section A; Subsection 6 - Amend as shown

- 6) Each new lot shall also meet the requirements of §128-53, "Lots Bordering Streams", of the Zoning Law, and all local, state and federal standards regarding protection of freshwater wetlands, and §128-49 of the zoning law and Chapter 98 of the Code of the Town of Bethlehem.

§103-26. Layout of Streets and Roads

Section D - Amend as shown

- D) Grading and storm water improvements. Site grading and improvements related to management of storm water quality and quantity shall conform to Town specifications and shall be approved as to design and specifications by the Town Engineer or duly authorized representative. In addition, development of the parcel shall conform with the State Pollutant Discharge Elimination System (SPDES) Phase II Storm Water requirements and §128-49 of the zoning law and Chapter 98 of the Code of the Town of Bethlehem.

§103-34. Minor Subdivision Application and Plat Data

Section B - Subection 1. Add section q - as shown

- q. Preliminary storm water drainage system plan. Drainage structures shall be shown on the preliminary layout, indicating the direction of flow, the approximate location and size of proposed lines and culverts and their profiles, as well as connections to existing lines or alternative means of disposal. This shall include, as required, the proposed size and location of detention basins and other storm water management facilities as required to comply with the State Pollutant Discharge Elimination System (SPDES) MS4 requirements and Chapter 98 of the Code of the Town of Bethlehem.

§103-35. Major Subdivision Application and Preliminary Plat Data

Section E - subsection 11. Amend as shown

- 11) Preliminary storm water drainage system plan. Drainage structures shall be shown on the preliminary layout, indicating the direction of flow, the approximate location and size of proposed lines and culverts and their profiles, as well as connections to existing lines or alternative means of disposal. This shall include, as required, the proposed size and location of detention basins and other storm water management facilities as required to comply with the State Pollutant Discharge Elimination System (SPDES) MS4 requirements and Chapter 98 of the Code of the Town of Bethlehem.

Town Code
Town of Bethlehem
Chapter 128
Zoning Law Amendments

§128-40. Planned Development District PDD

Section C Subsection C-2-d-x -- Amend as shown

- (x) A preliminary storm water management plan for the property, showing the proposed storm water collection and management system, including discharge points and provisions intended for MS4 Phase 2 Storm Water compliance pursuant to General Permit GP-02-01, any renewals and extensions thereto and Chapter 98 of the Code of the Town of Bethlehem.

§128-49. Grading, Erosion and Sediment Control

Section C Subsections 1 amend as shown and insert subsection 2

- C) Regulated Activities. The following activities shall require a Grading, Erosion and Sediment Control Permit pursuant to this section:
- 1) Land disturbance of one-quarter (0.25) acre but less than one (1) acre of land within the designated MS4 Phase II Storm water areas of the Town.
 - 2) Land disturbance of one (1) acre or more shall comply with this section and Chapter 98 of the Code of the Town of Bethlehem.
 - 3) Land disturbance within one-hundred (100) feet of the of the bank of the following streams or within the one hundred (100) Year Flood Zone of said streams:
 - a) Normans Kill Creek
 - b) Vloman Kill Creek
 - c) Onesquethaw Creek
 - d) Phillipin Kill Creek
 - e) Dowers Kill Creek south of Route 32
 - f) As used herein "bank" refers to the location of the mean high water level.
 - 4) Excavation or filling which exceeds a total of two hundred (200) cubic yards of material per acre within any parcel or any contiguous parcels in any twelve (12) month period.

Section E -- Delete subsection 1); amend subsections 2 through 4 as shown

- 1) Activities performed in conjunction with special use permit, site plan, or subdivision approvals granted by the Planning Board following the effective date of this Chapter, so long as said activities are not commenced until after the grant of a permit/approval and so long as the application for said activities has been reviewed for conformance with this Chapter and Chapter 98 of the Code of the Town of Bethlehem and approval has been conditioned upon compliance with the standards set forth herein, and further provided that the activities

shall be subject to and not exempt from the provisions for inspections, enforcement, penalties and revocations set forth herein.

- 2) Activities performed in conjunction with special use permit, site plan, or subdivision approvals granted by the Planning Board or Zoning Board of Appeals prior to the effective date of this Chapter and Chapter 98 of the Code of the Town of Bethlehem, provided that such activities are commenced within one (1) year of the date of approval.
- 3) Activities performed in conjunction with the erection, structural alteration or movement of a structure or building for which a building permit is granted following the effective date of this Chapter and Chapter 98 of the Code of the Town of Bethlehem, so long as said activities are not commenced until after the grant of a permit/approval as provided herein, and so long as the application for said activities has been reviewed for conformance with this Chapter and approval has been conditioned upon compliance with the standards set forth in herein, and further provided that the activities shall be subject to and not exempt from the provisions for inspections, enforcement, penalties and revocations set forth in herein.

Section F - Subsection 2-b-(iv) and Subsection 2-b-(v) amend as shown

- (iv) The Town Engineer may also require information depicting the watershed tributary to the proposed area of disturbance including proposed controls and diversions of upland water;
- (v) Except for applications involving one (1) single family dwelling, The Town Engineer may also require the depth to bedrock and depth to water table to be identified in all areas of disturbance;

Section F - Delete Subsection 2-c-(v)

Section J - Amend as shown

- J. Enforcement. Any activity that requires a Grading, Erosion and Sediment Control permit as provided herein, and is commenced without one, or is conducted contrary to the approved Grading, Erosion and Sediment Control permit, shall be deemed a public nuisance and may be restrained by an order to stop work, and/or injunction, and/or direct action by the Town to abate the condition, and/or any other manner provided by law as included in §128-83. The Building Inspector and / or Town Engineer may issue a stop-work order for the entire construction and site work/disturbance project, or any specified portion thereof, if it is determined that any of the following conditions exist:

Section U - Amend as shown

- U. Where the activity subject to this Chapter also requires a building permit, the Building Inspector shall not issue a building permit until the building permit application has been reviewed and approved by the Town Engineer for conformance with this section and Chapter 98 of the Code of the Town of Bethlehem.

128-69. Special Use Permit Review and Approval

Section F - insert subsection 21

- 21) Stormwater Management. The proposed use shall be designed to be in compliance with Chapter 98 of the Code of the Town of Bethlehem.
- 22) Additional safeguards and conditions. The Planning Board shall impose additional conditions and safeguards upon the special use permit as may be reasonably necessary to assure continual conformance to all applicable standards and requirements, including reasonable assurances that these standards and requirements can be responsibly monitored and enforced.

§128-71. Site Plan Review and Approval

Section A; subsection 24 - amend as shown

- 24) Adequate provisions for the handling of storm water run-off, including retention/detention, piping or channeling to existing or proposed drainage systems, during and after construction in accordance with Chapter 98 of the Code of the Town of Bethlehem.

Section E; subsection 9 - amend as shown

- 9) Drainage. The proposed development shall be so designed as to provide for proper surface water management through a system of controlled drainage that preserves existing drainage patterns and protects other properties and the environment. The storm water management design shall include controls for water quantity and water quality as required under the Phase II Storm water program in accordance with the latest State Pollutant Discharge Elimination System permit and Chapter 98 of the Code of the Town of Bethlehem.

Town Code
Town of Bethlehem
Chapter 97
Solid Waste Amendments

97-2.1. Waste excavation material – Amend as shown

Waste excavation material of any kind shall not be discharged, disposed of, deposited or buried within the Town of Bethlehem unless said material is clean and uncontaminated by any hazardous or toxic substance and does not include solid waste or construction and demolition materials or debris. The discharge, disposal, depositing or burial of such waste excavation material within the Town shall require a permit and be performed in accordance with Chapter 98 of the Code of the Town of Bethlehem.

97-7. Permits – Amend as shown

Notwithstanding the provisions of this article, the Town Board may, upon good cause shown, grant permits for dumping and/or the operation of a public dump or dumping within the Town on such terms and conditions as to the Town Board seem necessary or desirable, including but not limited to compliance with Articles II and/or III of this chapter and, also, the posting of such security or liability insurance as the Town shall deem necessary.

97-14. Fees for permits – Amend as shown

The Superintendent of Highways, subject to the approval of the Town Board, shall adopt a schedule of fees for solid waste permits issued pursuant to this article. Said schedule may further provide for deposits or other security to be posted by the commercial waste collector or person using a solid waste facility, including but not limited to liability insurance of a nature and in an amount which shall be acceptable to the Superintendent of Highways. Permits shall be available at the office of the Town Clerk or at such other places as the Town Supervisor shall designate.

97-33. Construction standards; insurance requirements – Amend as shown

(9) Stormwater treatment facilities and erosion control practices in accordance with Chapter 98 of the Code of the Town of Bethlehem, shall be developed and made available for use prior to excavations on any other portions of the site which require pumping for discharge of accumulated surface waters.
