WHAT'S THE PROBLEM WITH PET WASTE?

Pet waste is loaded with bacteria that can make people sick. When left on the ground, rainwater and melting snow can wash it into storm drains and waterways polluting streams, beaches, and drinking water. Estimates show that 20%-30% of water pollution in America comes from pet waste.

TIPS TO PROTECT WATER AND KEEP YOUR NEIGHBORHOOD CLEAN:

- 🐾 Pick up after your pet.
- 🐾 Properly dispose of pet waste by flushing it down the toilet or placing it in a sealed bag in the trash. (*check local laws*)
- 🐾 Never put waste down the storm drains, in catch basins or in bodies of water.
