### I. Background Information

### Joint Coalition Stormwater Management Program Plan (SWMP Plan) Document

In 2012, members of the Stormwater Coalition of Albany County committed to collaboratively developing a Stormwater Management Program (SWMP) document which fit the SWMP definition in the NYSDEC SPDES General Permit for Stormwater Discharges form Municipal Separated Storm Sewer Systems (MS4s) Permit No. GP-0-10-002. That definition states that a SWMP should:

- 1) Describe the Best Management Practice (BMP)/measurable goal
- 2) Identify time lines/schedules and milestones for development and implementation
- 3) Include quantifiable goals to assess progress over time; and
- 4) Describe how the covered entity will address pollutants of concern (POCs).

When developing a SWMP document, cooperation between covered entities is also encouraged, see Part IV. A. and B. of the MS4 Permit, thus the Coalition decision to collaborate. At that time, the intent was to build off of pre-existing SWMP documents developed by individual Coalition members and to write and organize the SWMP language to fit the data structure of *MS4Web Permit Manager*, a software package developed by CBI Ltd which members had previous purchased using NYSDEC Stormwater Implementation grant money.

Since then, the SWMP document created, referred to has SWMPv2, with a time frame ~2012 to 2015, has been submitted to regulators (EPA and NYSDEC) for multiple MS4 Permit Audits and feedback has been helpful. Recognizing that SWMPv2 needed to be updated, members of the Coalition again collaborated, creating SWMPv3 which covers the time frame from 2015 to 2017. This corresponds to the interim MS4 Permit No. GP-0-15-003 issued by NYSDEC, effective May 1, 2015 to expire April 30, 2017. As of May, 2017 this same interim MS4 Permit has been extended to potentially expire in April, 2018.

Typically when preparing the MS4 Permit annual report which covers a reporting period from March 10 to March 9, Coalition members review an *MS4Web Permit Manager* generated document titled, "BMP Data Report". BMPs and goals included in this report are identical to those of the SWMP document therefore, as needed the BMP Data Report can double as the SWMP document.

Unlike the SWMP document, the BMP Report notes which goals have been met or unmet and text is provided which explains why a goal has been modified or dropped. Goals which are repeatedly unmet may indicate a poorly conceived goal at the outset or management concerns which need to be addressed. If a goal is met, then an MS4 can move on to other program areas. Future goals for 2018 can be included in the report as well.

This particular SWMPv5 document/BMP Data Report was downloaded from MS4Web Permit Manager on 4/24/2017, which is the date stamp located on the upper right of the document. Typically the annual review process prompts minor changes in the SWMP document and once the annual review is completed, a download date is locked in for a particular version of the SWMP document. Thus, a very similar SWMP document may be labeled SWMPv4 or SWMPv5 and each version is associated with a particular download date.

Goals found in the SWMP document/BMP Data Report are typically incorporated in the MS4 Annual Report which is filed no later than June 1.

### **II. Stormwater Coalition of Albany County**

As of May, 2016, there are twelve members of the Stormwater Coalition of Albany County and they are all cosignatories of an inter-municipal agreement/memorandum of understanding. As such they pay dues, serve on a Board of Directors, make financial decisions about the Coalition budget, participate in monthly Working Group meetings, and to varying degrees rely on Coalition staff and other members to be in compliance with MS4 Permit requirements.

The first intermunicipal agreement was signed in 2008 and most of the current Coalition members date back to that initial inter-municipal agreement. The current agreement is effective until December 31, 2017.

Below is a list of Coalition members, along with their MS4 Permit SPDES No. in parenthesis.

Traditional Non Land Use Control MS4	Traditional Land Use Control MS4s		
Albany County (NYR20A359)	City of Albany (NYR20A464)	Village of Green Island (NYR20A377)	
Non-Traditional MS4	Town of Bethlehem (NYR20A208)	Town of Guilderland (NYR20A211)	
University at Albany-SUNY (NYR20A234)	City of Cohoes (NYR20A243)	Village of Menands (NYR20A144)	
	Town of Colonie (NYR20A190)	Town of New Scotland (NYR20A463)	
	Village of Colonie (NYR20A076)	City of Watervliet (NYR20A087)	

Maps describing the jurisdictional area of these regulated MS4/municipalities follow, along with the status of waterbodies throughout Albany County (stream classification and listing on the waterbody inventory/priority waterbody list "WIPWL")

Overall, Coalition members work towards the shared goal of improving water quality as expressed in the day-to-day implementation of this particular Clean Water Act SPDES Permit known as the "MS4 Permit".

### 1. 1-1 Target Audience Analysis Worksheet

BMP 1-1 The purpose of this Worksheet is to systematically use mapped information to analyze the status of waterbodies within the MS4 entity, or potentially impacted by the MS4, and based on this information, identify: geographic areas of concern; waterbodies of concern; likely sources of pollutants; and possible target audiences. The Worksheet helps MS4s prioritize program-wide intiatives and craft related measurable goals which are then incorporated into other BMPs described elsewhere in this SWMP Plan document. Mapped information used to complete the Worksheet is updated as needed.

### Implementation Tasks

Task			Due Date	Implemented	Date Completed
Meası	urable Goals				
Goal		Permit Year	Due Date	GoalMet	Date Goal Met
1.	1-1 MG1 Coalition. By 3/9/2016 Coalition updates TAAW Worksheet and Map Set. Both are posted on the Coalition website (Plan and Program tab). Map updates include: 2010 MS4 Permit urbanized area (2010 census); 2014 303d waterbody list; watershed delineation for Ann Lee & Stump Pond and other waterbodies.	2017	03/09/2016		03/09/2016
	Activities				
	Activity Date				
2.	1-1 MG2 Coalition. By 3/9/2017, the Coalition updates the text of the target audience analysis worksheet so that directions are clarified. The worksheet may be modifed to use as an instructional tool for Clean Water Act Basics presentations or general use by municipal staff. The purpose of the Worksheet and related modifications is to help individuals better understand how their local streams are classified (their "Best Use"); how they've been assessed (WI/PWL); and the regulatory significance of an impaired water body (303d listed) given Clean Water Act SPDES Permits of all types (general/individual; stormwater/others).	2017	03/09/2017	<b>V</b>	03/09/2016

### 2. 1-2 Public Employees [MOVED, see explanation]

**Implementation Tasks** 

EXPLANATION: The NYSDEC Annual Report tracks the education of "public employees" within Minimum Control Measure 1 Public Education and Outreach; the training of "municipal officials" in MCM 5 Post-Construction Stormwater Management; and the training of "municipal employees" in MCM 6 Pollution Prevention/Good Housekeeping. For this SWMPv3 (2015 to 2017), all BMPs related to training staff and municipal officials have been consolidated. They can be found in MCM 8 Training-Staff, Planning/Zoning Board, and Other Municipal Officials. This is to help MS4/municipalities identify and describe training topics of interest and to better match who needs to be trained in what topics throughout their MS4 across multiple MCMs.

### 3. 1-3 Websites

Multiple websites are used to implement stormwater program objectives, with educating the public about pollutants of concern; explaining what individuals can do to do prevent stormwater pollution; explaining the regulations; announcing educational programs and public participation events; posting information about each Coalition member (MS4/municipality); and providing a place to submit comments about the Annual Report and Stormwater Management Program, the primary purpose of the Stormwater Coalition website. Coalition members also post stormwater information on their own websites. Links back to the Stormwater Coalition website establish a pathway to public input regarding the Annual Report and SWMP Plan. Links also provided if possible to web based complaint portals. Use of the Coalition website for what purpose is tracked, as are local MS4 websites, if possible. Updates to all stormwater web pages, as needed. This BMP and related goals describe these initiatives.

### 4. 1-4 Publications

The Coalition provides hard copy educational material for members. Publications cover a range of topics targetting various audiences, pollutants of concern, and other program priorities (green infrastructure, maintenance of stormwater practices, municipal operations, etc.). This BMP addresses the cost and management of the publication inventory and plans for future publications. For interested MS4s, the BMP includes specific goals related to distribution. (what info, to whom, where, by whom, when, why). Goals consider educational priorities suggested by the Target Audience Analysis Worksheet process.

5. 1-5 Getting To Know The Stream Next Door Program (Hands-On Activities: Proj Wet, Macroinvertebrate ID, Games, Demos) [RENAMED, see explanation]

EXPLANATION and BMP DESCRIPTION. The Coalition has developed a program titled, "Getting To Know The Stream Next Door" which includes hands-on Project Wet activities, watershed education, enforcement scenarios, watershed mapping information, green infrastructure concepts, and water quality testing using macro invertebrates. Coalition staff and/or members are available to present some or all program content. Project Wet Kits are available to members. While the target audience is often school age children (school or parks program), thus the previous BMP title "SCHOOL PROGRAMS (Parks/Recs; Higher Ed)", the program is suitable for all ages and multiple venues. This new title is thought to better describe key, hands-on elements of the Getting To Know The Stream Next Door Program. For interested MS4s, this BMP includes goals which consider educational priorities suggested by the Target Audience Analysis Worksheet.

### 6. 1-6 Public Programs-Guest Speaker/Participant [RENAMED, see explanation]

The Coalition Stormwater Program Coordinator and/or Individual MS4 Stormwater Program Coordinators may be asked to speak at public events. They are available upon request, time permitting. Content of presentations includes any aspect of MS4 Permit stormwater program compliance. Data is collected regarding program (when, where, why, audience, content). [EXPLANATION. The previous naming of this BMP (BMP 1-6 Public Programs) did not distinguish between types of public programs and who may be responsible for organizing the event. This renaming of the BMP, now BMP 1-6 Public Programs-Guest Speaker/Participant makes that distinction. A second BMP titled, 1-14 Public Programs-Organized by Coalition and/or Ind MS4s similarly makes clear that these are public programs intentionally organized by either the Coalition or individual MS4s.]

#### 7. 1-7 List Serves

Coalition staff maintain an e-mail list (list serve) of individuals interested in or involved in some aspect of stormwater management. The e-mail list is used to announce the availability of the DRAFT Joint Annual Report for review and comment and to solicit comments from the public regarding the SWMP Plan document and program implementation more generally (Coalition and individual MS4s). The list serve is also used to publicize public programs organized by the Coalition. Individual MS4s may supplement the Coalition list serve with their own stormwater related contacts or develop their own list serve (e-mail list).

#### **Implementation Tasks Due Date Implemented Date Completed** Task **Measurable Goals** GoalMet Goal **Permit Year Due Date Date Goal Met** 1. 1-7 MG1 Coalition. By 3/9/2016, the Coalition maintains and updates 2017 03/09/2016 **✓** 03/09/2016 a Coalition-wide database (Microsoft Access) of e-mail addresses and other contact information. Database includes individuals interested in or responsible for some aspect of program implementation. The database tracks program attendance and is used to solicit public comments for the annual report, SWMP Plan document, and program implementation more generally. If the e-mail list drops below 400 contacts, Coalition staff, with help from members, actively seek out and add to this e-mail list. **Activities Activity Date Activity Description** 1-7 MG2 Coalition. #### 9. 1-9 Mailings: Newsletters, Letters from Elected Officials

Some MS4 communities routinely mail a letter or newsletter (electronic or US mail) to residents and/or employees which includes a stormwater message. The stormwater message may be from the Chief Elected Official directly or included in the body of the newsletter. Goals related to this BMP mention the frequency of the message, content of the message, target audience, size of distribution, etc. In general the information provided, for whom is based on educational priorities suggested by the Target Audience Analysis Worksheet. Examples of MS4s with newsletters: Villages of Altamont, Colonie, Green Island, and Menands; Town of Bethlehem; and Albany County.

14.	1-9 MG3 V/Menands. By 3/9/2018, the Village of Menands Program Coordinator will prepare an article(s) about development activity in the Village. The article(s) will explain the purpose and benefits of	2018	03/09/2018		

stormwater practices observed at these sites (erosion/sediment control; sw ponds, etc.) and encourage the public to contact the Village if there are complaints. The article will circulate in the Village newsletter (Menands Activities) and be posted on their website. Target audience: Residents and Businesses. Teh same article may be mailed out in water utility bills.

Activities  Activity Date Activity Description			
1-9 MG3 V/Colonie. By 3/9/2018, the Village of Colonie Stormwater Management Officer will work with the Deputy Mayor to provide new "advertisements" in the Village newsletter "The Villager". The new advertisements will promote education of Pollutants of Concern. Two advertisements in total will appear in the newsletter issued in June and September as follows: 1) "Pesticide Application, Lawn Care & Landscaping"; 2) "Use Phophorous Free Fertilzer".	2018	03/09/2018	
Activities  Activity Date Activity Description			
1-9 MG3 V/Green Island. By 3/9/2018, the Stormwater Program Coordinator will continue to include a stormwater message in various hard copy mailings (Mayor's Letter and/or Newsletter) to residents and businesses. These newsletters are also posted on the Village website. Various pollutants of concern will be featured. The mailings are included with various monthly utility bills.	2018	03/09/2018

#### 10. 1-10 Mailings: Utility Bills, Payroll

Some MS4s distribute educational material in utility bills; others in payroll mailings (non-traditional MS4s/County MS4s). Goals mention frequency and/or content of stormwater information and are based on educational priorities suggested by the Target Audience Analysis Worksheet. (ex. City of Cohoes, Villages of Colonie, Town of New Scotland, Albany County)

#### **Implementation Tasks**

11. 1-11 Signage-Stormwater Practices and Stream Crossings [RENAMED, see explanation]

To raise awareness about local waterbodies and specific stormwater practices municipalities post new signage and maintain existing signage. Signage goals reflect Target Audience Analysis Worksheet priorities and Chapter 3, Section 3.5 Maintenance Requirements of the New York State Stormwater Management Design Manual (2015), pg 3-12. [EXPLANATION. This BMP was originally titled, "Kiosks, Signs, and Displays". Distinquishing between these types of displays proved to be confusing. Also, several MS4s were actively installing signage throughout their MS4; therefore, to capture that activity, a stand-alone BMP for signage was created. The other display types Kiosks and Displays were grouped with Brochure Racks, a distinct activity, now stand-alone BMP 1-17 Brochure Racks, Kiosks, and Displays.]

#### 13. 1-13 Green Infrastructure Clinics [MODIFIED, see explanation]

**Implementation Tasks** 

Original BMP SWMPv2 2012 to 2015 Description: Hands on learning can be very effective. With 8 demonstration rain gardens well positioned throughout the MS4 communities and extensive real world experience designing, planting, correcting, and maintaining these rain gardens, the Rain Garden Partnership organizations (Coalition, Coalition member municipalities, Cornell Coop Ext-Master Gardens, and ACSWCD) are well positioned to develop conveniently located on-site Rain Garden Clinics. This needs to be explored, along with Clinics targeting other green infrastructure practices. [EXPLANATION. This BMP dropped as stated. Using existing rain gardens for training purposes has been retained. See MCM Training: BMP 8-9 Maintaining Green Infrastructure Practices-Demo Rain Gardens (In-House)

#### 14. 1-14 Public Programs-Organized by Coalition and/or Ind MS4s

BMP 1-14 These are public programs organized by the Coalition and/or Individual MS4s. The content and target audience reflects educational priorities suggested by the Target Audience Analysis Worksheet or stormwater program needs more generally. They may include hosting webcasts (ex. Center for Watershed Protection), tours, or participating in public meetings typical of municipal operations (municipal boards). Goals may reflect Coalition wide or individual educational priorities.

#### 15. 1-15 Tabling Events-Fairs, Farmers Mkts, Conferences, Other

BMP 1-15 These are events organized by others where Coalition staff and/or individual MS4 set up literature tables and/or displays for a limited time period. The content of the material reflects the location of the event and audience. Prioritizing participation in these events is based on educational priorities suggested by the Target Audience Analysis Worksheet. Goals may reflect Coalition wide and/or individual educational priorities.

#### 16. 1-16 Household Haz Waste Collection & Other Clean Ups-Water Quality Benefits Explained

Publicity related to household hazardous waste collection days and/or other clean up events is an opportunity to explain the water quality benefits of recycling and/or properly disposing products that contain chemicals such as insecticides, pesticides, paint solvents, used motor oil, and other fluids...message explains stormwater runoff and "Don't Pour Down The Drain", Similarly, for some clean up events, the value of removing 'gross solids' such as yard waste is explained. Various publications (newsletters, e-mail notices, flyers, etc.) can be used to promote this message. Goals are based on educational priorities suggested by the Target Audience Analysis Worksheet and may include # who receive communication, type of publication, description of water quality message, frequency of water quality message given number of clean up events. This BMP includes municipalities with active Houshold Hazardous Waste Collection Day events and MS4s with other types of routine clean ups (ex. campus wide clean up).

10	1-18 Storm	Drain	Markars	andlar	Stancile

1-18 These are messages placed next to storm drains (catch basins) which may state, Don't Dump, Drains to \_\_\_\_\_ (Name of Waterbody). Municipal staff, not volunteers, apply the message. Location is based on educational priorities suggested by the Target Audience Analysis Worksheet, illicit discharges (pollutants) observed inside or near catch basin, proximity of catch basin to pedestrian traffic, convenience of applying the message, and other factors unique to each MS4.

#### 19. 1-19 Target Audience Analysis Worksheet-Intermunicipal Initiatives

If a group effort, once the Target Audience Worksheet is completed there may be educational initiatives best implemented as an inter-municipal/MS4 project within a particular geographic area. This BMP establishes which MS4s may choose to implement an intermunicipal intiative to do what, where, why, by when, by whom.

#### **Implementation Tasks**

Task	Due Date	Implemented	Date Completed
- 44-1			

#### **Measurable Goals**

Goal	Goal		Due Date	GoalMet	Date Goal Met
1.	1-19 MG1 University at Albany. By 3/9/2016, the UAlbany Stormwater Program Coordinator will discuss with other Coalition members Normanskill: Krumkill sub-watershed projects.	2017	03/09/2016		

#### **Activities**

Activity Date	Activity Description

- 1. 03/09/2016 Goal dropped, not a priority.
- 1-19 MG1 Coalition. By 3/9/2016, the Stormwater Coalition Program 2017 03/09/2016 Coordinator will discuss with Working Group members Target Audience Analysis Worksheet-Intermunicipal Initiatives considered during the SWMPv3 Update sessions (April, 2015).

#### 20. 1-20 Homeowner & Neighborhood Association Troubleshooting & Education

In response to questions and concerns from Homeowner Association's responsible for managing stormwater practices and/or Neighborhood Associations concerned about stormwater runoff in their communities, typically the individual MS4 Stormwater Program Coordinator is contacted. The Program Coordinator follows up with information, educational material, and often site visits. This BMP includes goals related to how the SW Program Coordinator responds and addresses educational needs.

#### 22. 2-2 Annual Report & Program Comments

This BMP relates to the timeline and process for public input and comments regarding the Annual Report, Stormwater Management Program Plan document (SWMP Plan, BMPS and goals) and program implementation more generally. The FINAL Annual Report must be submitted to NYSDEC by June 1. If the criteria is met, MS4s can submit either an individual or joint annual report. The public must have the opportunity to comment on the report, this can be done via the internet or as a public meeting. The details are explained in Part VII.A.2.d and Part VIII.A.2.d of the MS4 Permit. This BMP describes how these requirements are met by the Coalition and members.

#### **Implementation Tasks**

Task	Due Date	Implemented	Date Completed
1 4011	_		Date Compieted

#### **Measurable Goals**

Goa	ıl	Permit Year	Due Date	GoalMet	Date Goal Met
1.	2-2 MG1 Coalition. By 6/1/2016, Coalition members decide if they are submitting individual annual reports or a joint annual report. If joint annual report, Coalition members commit to the following schedule: DRAFT Joint Annual Report posted on the Coalition website (end of the first week in May); availability of DRAFT Annual Report sent to Coalition list serve, public comment period announced, and public comments regarding SWMP Plan encouraged; two week public comment period for Annual Report ends (~third week in May); public comments collected and included in FINAL Joint Annual Report; and public meetings scheduled if requested. Individual MS4s may present DRAFT or FINAL Annual Report at public meeting (Common Council Meeting, Town or Village Board meeting). Some MS4s communicate availability of DRAFT or FINAL Joint Annual Report for comment to their own e-mail lists. Annual Report submitted to NYSDEC by June 1, 2016. FINAL Joint Annual Report posted on Coalition website and individual MS4 websites.	2017	06/01/2016		03/09/2017

#### **Activities**

	<b>Activity Date</b>	Activity Description
1.	03/09/2017	Joint Annual Report 2016 (AR2016) due June 1, 2016 released to public online for comment and submitted to NYSDEC on time.

2. 2-2 MG2 Coalition. By 6/1/2017, Coalition members decide if they are 2017 06/01/2017

submitting individual annual reports or a joint annual report. If joint annual report, Coalition members commit to the following schedule: DRAFT Joint Annual Report posted on the Coalition website (end of the first week in May); availability of DRAFT Annual Report sent to Coalition list serve, public comment period announced, and public comments regarding SWMP Plan encouraged; two week public comment period for Annual Report ends (~third week in May); public comments collected and included in FINAL Joint Annual Report; and public meetings scheduled if requested. Individual MS4s may present DRAFT or FINAL Annual Report at public meeting (Common Council Meeting, Town or Village Board meeting). Some MS4s communicate availability of DRAFT or FINAL Joint Annual Report for comment to their own e-mail lists. Annual Report submitted to NYSDEC by June 1, 2017. FINAL Joint Annual Report posted on Coalition website and individual MS4 websites.

**Implementation Tasks** 

#### 23. 2-3 Stormwater Management Program (SWMP) [MOVED, see explanation]

Original BMP SWMPv2 (2012 to 2015) Description: The MS4 Permit states explicit requirements regarding developing a Stormwater Management Program (SWMP) and Stormwater Management Program Plan (SWMP Plan). A SWMP, by definition needs to include Measurable Goals for each Best Management Practice (BMP). A SWMP Plan includes a detailed written explanation of all management practices, activities, and other techniques the covered entity has developed, planned, and implemented for their SWMP. This is a collaborative Coalition SWMP listing Coalition and individual MS4 BMPS, Tasks, and Measurable Goals; SWMP Plan documents specific to the MS4 are located in MS4 offices. [EXPLANATION. BMP MOVED to MCM7 BMP 7-4 SWMP Document. Creating a SWMP document and engaging the public in program development are two distinct activities. The intent of this BMP is to ensure that a compliant SWMP document is completed for use by all Coalition members. Such a document is a management tool; as such fits within MCM 7 Stormwater Program Management. Goals pertaining to SWMP public comments are contained in BMP 2-2 Annual Report and Program Comments.]

#### 24. 2-4 SWMP Stakeholder Meeting [DROPPED, see explanation]

Implementation Tasks

Original BMP SWMPv2 2012 to 2015 Description: Stakeholder meetings to discuss program development and implementation provide an opportunity for buy-in by the general public and others specifically interested in stormwater management. If at educational events, or as a consequence of internal individual MS4 meetings, there is an interest in SWMP specifics, the contact information of interested individuals will be obtained and pooled together for a public meeting. [EXPLANATION. While there may be an interest in stormwater issues; there is minimal awareness of overall stormwater program requirements and how regulated MS4s are addressing these requirements. Any effort to encourage a "SWMP Stakeholder Meeting" has minimal value and draws resources away from other, more beneficial activities. For these reasons, this BMP has been dropped.]

#### 27. 2-7 Demonstration Rain Gardens Partnership [MODIFIED, see explanation]

**Implementation Tasks** 

Original BMP SWMPv2 2012 to 2015 Description: Eight demonstration rain gardens have been constructed since 2008 and these need to be maintained properly or potentially decommissioned. A management tool to better track maintenance responsibilities and needs, as well as create an archive of rain garden activity will be created and disseminated to individual MS4s and partners. [EXPLANATION. Demo Rain Gardens have been built. Now the focus is on teaching municipal staff and volunteers how to maintain rain gardens and other vegetative green infrastructure practices. BMP 2-10 Green Infrastructure Stewardship and 8-9 Training Topic: Maintaining GI Practices-Demo Rain Gardens (In-House) address these needs.]

30. 2-10 Green Infrastructure Stewardship (Plantings and Maintenance) [RENAMED, see explanation]

Individual MS4s involve volunteers in tree planting activities along riparian buffers and in neighborhoods (beautification and stormwater management). Other volunteer initiatives include planting and maintenance of vegetation used in various green infrastructure practices (bioretention, rain gardens, planters). (Ex. City of Albany, City of Cohoes). [EXPLANATION: This BMP was previously titled, BMP 2-10 Tree Plantings. Over the years, this proved to be too limiting. In fact, municipalities engage in multiple strategies to engage volunteers in vegetation related activities. The BMP title was changed to capture the many ways volunteers can support green infrastructure practices which involve plants.]

#### 31. 2-11 WAVE - Water Assessments by Volunteer Evaluators

NYSDEC has developed an effective volunteer stream monitoring initiative called WAVE. Individual staff associated with the Coalition have received WAVE training and are prepared to work directly with volunteers. Given location geography and a limited number of acceptable monitoring sites across all Coalition member municipal boundaries, implementing a WAVE program needs to be Coalition wide. Planning, coordination, and follow up is key. Goals here reflect the participation of all Coalition members and recognize the central role NYSDEC plays in overseeing the WAVE program. Note: WAVE initially stood for Wadeable Assessments by Volunteer Evaluators; it has since been changed to Water Assessments by Volunteer Evaluators.

#### 32. 2-12 Watershed Troubleshooting - Stakeholder Projects

Often driven by citizen complaints, individual MS4s may choose to engage key stakeholders in addressing a critical water quality problem or related drainage issue. Given that a seemingly isolated issue may in fact be caused by hydrological conditions either upstream or downstream of the problem, the solution may require a watershed, multi-stakeholder, intermunicipal approach. This BMP describes evolving projects for relevant MS4s, plausible goals, and anticipated issues (ex. Village of Menands and Town of Colonie/Albany Rural Cemetary; Siena College Stormwater Master Plan; Normanskill: Krumkill subwatershed)

#### **Implementation Tasks**

Task	Due Date	Implemented	Date Completed

#### 33. 3-1 Map Outfalls

An outfall is any point where a municipally owned and operated separated storm sewer system discharges to either surface waters of the State or another MS4. For older MS4s, most outfalls have been mapped, new outfalls however are often discovered in the field or exist in an expanded urbanized area and these need to be mapped. Outfalls mapped in error ie they're not outfalls, need to be removed from the database. New MS4s need to map their outfalls. The continued use of a GIS system to display outfalls is helpful. Goals describe the status of current mapping needs and program priorities.

#### **Implementation Tasks Task Due Date Implemented Date Completed Measurable Goals** GoalMet Goal **Permit Year Due Date Date Goal Met** 1. 3-1 MG1 Albany County. By 3/9/2016, Albany County will map and 2017 03/09/2016 **✓** 03/09/2016 upload into a GIS platform (AIMS, desktop) all new outfalls identified during ORI field work. **Activities Activity Description Activity Date** 3-1 MG1 V/Menands & Coalition. By 3/9/2017, the Village of 03/09/2017 2017 Menands SW Program Coordinator will oversee and coordinate with Coalition staff an updated storm system infrastructure map using GIS and make corrections to mapped outfalls as needed. **Activities Activity Date Activity Description** 03/09/2017 GOAL DROPPED. #### 34. 3-2 Coalition Stormwater Program Mapper [Modified BMP title]

In 2015, the Coalition Board of Directors allocated reserve funds to redesign the Albany Internet Mapper (AIMS). For details of decision process, see SWMP document (SWMPv3 or SWMPv4), BMP 7-5 Water Infrastructure GIS-AIMS In Transition. The consultant supported mapper redesign was initiated February, 2016. A 2015 grant award (see BMP 7-9 Grant Management) resulted in additional funds to support using GIS to manage and guide other MS4 Permit requirements. Some grant funded projects include the creation of inspection forms to use in the field for "ORI" outfall inspections, MS4 construction site inspections, municipal facility self audits, and inspection of post construction stormwater practices. These inspection forms may be linked to the Coalition Stormwater Program Mapper. Other funds will support the creation of unique map layers useful when managing stormwater across multiple MS4 Permit MCMs. While this Coalition Stormwater Program Mapper BMP 3-2 is embedded in MCM 3 IDDE, it is in fact a BMP which applies to many other MCMs. For now, goals associated with the mapper will continue to be described within BMP 3-2. [BMP title modified. "AIMS" dropped; new title emphasizes purpose of mapper, stormwater program implementation.]

35. 3-3 Enterprise GIS (Individual MS4s) [MOVED, see explanation]

**Implementation Tasks** 

Original BMP SWMPv2 2012 to 2015 Description: Some individual MS4-municipalities own and maintain their own GIS, which is available to staff responsible for implementing the MS4 permit and is similar to the Coalition Stormwater Mapper with regard to content. Management of the Enterprise GIS includes updates of relevant GIS layers and securing related administrative support, in particular staffing and funding. [EXPLANATION. MS4s with existing, well developed GIS capacity are increasingly looking to use GPS/GIS technology to address multiple stormwater program needs, not exclusivley related to mapping requirements embedded in MCM 3 (ex. field inspection forms linked to GIS, delineation of stormwater facilities, etc.). They're also interested in developing other water related map layes. For this reason, this BMP has been moved to MCM 7 Stormwater Program Management: BMP 7-6 Stormwater GIS & Program Mgmt Tools-Individual MS4]. Here members can more accurately describe a wider range of stormwater related mapping goals.

#### 36. 3-4 Storm System/Sewershed/Combined Sanitary Storm Mapping- Intermunicpal [MODIFIED BMP Title]

In 2015, Coalition applied for and received grant funds to complete storm system mapping and storm sewershed delineations for the Krumkill, Patroon Creek, and Shaker Trib-Ann Lee Pond watersheds. Given intertwined storm and combined storm sanitary infrastructure in the City of Cohoes and City of Watervliet, the grant award included funding to map combined sanitary storm infrastructure. System mapping is used to delineated intermunicipal storm sewershed boundaries and to support track down of pollution sources. Some MS4s continue with system mapping independently, without direct grant support, in some cases as an in-kind service to the grant. [BMP title modified from SWMPv3 BMP 3-4 Storm System/Sewershed Mapping-Intermunicipal, now includes combined sanitary-storm mapping].

37. 3-5 Dry Weather Outfall Screening (Outfall Reconnaissance Inventory "ORI")

The systematic inventory of outfalls during dry weather conditions will help identify non-stormwater discharges and related cross connections, as well as indirect non-stormwater discharges such as ground water seepage, spills and illegal dumping activities, outdoor washing, and non-target or irrigation water. Inventory results will suggest possible follow-up, related outreach and education, or enforcement action as detailed in the IDDE Local Law. The number and percentage of outfalls inventoried may be tracked, along with other data. Individual MS4 ORI completion goals and/or schedule are presented in this BMP.

#### **Implementation Tasks Task Due Date Implemented Date Completed Measurable Goals** GoalMet Goal **Permit Year Due Date Date Goal Met** 1. 3-5 MG1 Albany County. By 3/9/2016, Albany County completes ORI 2017 03/09/2016 for 124 outfalls that have been mapped but not inspected. **Activities Activity Date Activity Description** 03/09/2016 1. 38. 3-6 IDDE Local Law - Traditional MS4 (Towns, Villages, Cities, County)

This regulatory mechanism (adopting an IDDE local law) empowers municipalities (towns, villages, cities, and county) to implement and enforce its own IDDE program. The mechanism includes prohibition of illegal discharges and illegal connections; provisions for access and inspection of suspect facilities and properties; authority to enforce and eliminate illicit discharges; and names which staff are authorized to enforce the applicable ordinances and which enforcement mechanisms are available. MS4s permitted since 2003 include Cities of Cohoes, Albany, and Watervliet; Towns of Colonie, New Scotland, Guilderland, and Bethlehem; Villages of Colonie, Green Island, and Menands; and Albany County all of which have adopted local laws. Attorneys representing the municipality have certified that the enforcement mechanism is equivalent to State's model illicit discharge detection law. New MS4s permitted as of March, 2014, need to adopt and have certified an IDDE local law.

39. 3-7 Prohibit Illicit Discharges/ Enforcement Mechanisms - Non Traditional MS4s (Public University)

Lacking the authority to adopt local laws, Non-Traditional MS4s are required to develop their own regulatory mechanism to prohibit illicit discharges and through a written directive state that the updated mechanism must be used and name the individual responsible for compliance. The continued monitoring of enforcement strategies is important.

#### 40. 3-8 IDDE Program Procedures

Program procedures need to be written and circulated which explain all aspects of the IDDE program. The program must include procedures for identifying priority areas of concern (geographic, audience, or otherwise); a description of priority areas of concern, available equipment, staff, funding, etc; procedures for identifying and locating illicit discharges (trackdown); procedures for eliminating illicit discharges; and procedures for documenting actions. Written procedures may need updating, periodic review, and depending on the needs of the MS4, circulation across multiple departments.

#### 41. 3-9 Illicit Discharge Record Keeping

Regulated MS4s must routinely record the number of illicit discharges detected and eliminated. This same data can be used to identify geographic areas of concern and local behaviors which may contribute to water quality issues. Goals for this BMP minimally address record keeping requirements and potentially program initiatives related to education and outreach.

#### **Implementation Tasks Due Date Task Implemented Date Completed Measurable Goals** Goal **Permit Year Due Date** GoalMet **Date Goal Met** 1. 3-9 MG1 Albany County. By 3/9/2016 Albany County Stormwater 2017 03/09/2016 Program Technician establishes a routine method of collecting illicit discharge information from multiple sources (Albany County Dept of Health, DPW Field Crews, Complaints). Information is organized into a summary spreadsheet. **Activities Activity Description Activity Date** 3-9 MG1 V/Menands. By 3/9/2016 The Village of Menands SW 03/09/2016 **V** 2016 03/09/2016 Program Coordinator sets up a dedicated file of illicit discharges detected and eliminated. Data is summarized routinely for the DEC MS4 Permit Annual Report and includes all documnentation regarding the event. **Activities Activity Date Activity Description** 3-9 MG1 T/Bethlehem. By 3/9/2016, T/Beth SW Program Coordinator 2017 3. 03/09/2016 will generate a database of historic IDDE complaints for incorporation into the Town GIS program. Data will include permit requirements and necessary documentation regarding response.

42. 3-10 Illicit Discharge and Waste Disposal Education [MOVED, see explanation]

**Implementation Tasks** 

Original BMP SWMPv2 2012 to 2015 Description: Various venues and educational approaches will be used to educate the public, businesses and the general public about illicit discharges and waste disposal (training DVDs, field training, waste collection day event literature). [EXPLANATION. The MS4 Permit states that covered entities must, "Inform public employees, businesses, and the general public of the hazards associated with illegal discharges and improper disposal of waste and maintain records of notifications." Those portions of this permit requirement which pertain to staff training have been moved to MCM 8 Training: BMP 8-6 Training Topic: Waste Disposal-Liquids and Solids DVD: Rain Check]. Those portions which pertain to the general public have been moved to MCM 1 Public Education: BMP 1-16 Household Hazardous Waste Collection/Other Clean Ups-Water Quality Benefits Explained.

44. 4-1 Construction Activity Local Law - MS4s w/ Land Use Control (Towns, Villages, Cities)

This BMP establishes a regulatory mechanism (law, ordinance, other mechanism) such that towns, villages, and cities require for each applicable land disturbance activity a SWPPP which includes erosion and sediment controls that meet New York State's technical standards. The mechanism must be equivalent to one of the versions of the "NYSDEC Sample Local Laws for Stormwater Management and Erosion and Sediment Control" and equivalency to these sample local laws must be documented and certified by an attorney representing the MS4. MS4s regulated since 2003 have met this BMP; MS4s regulated since 2014 need to evaluate deadlines named in their NOI and adjust program goals accordingly. Coalition members with adopted and certified local laws include: Cities of Cohoes, Albany, and Watervliet; Towns of Colonie, New Scotland, Guilderland, and Bethlehem; and Villages of Colonie, Green Island, and Menands.

#### 45. 4-2 SWPPP Review Procedures (Erosion and Sediment Control)

**Implementation Tasks** 

Oversight by MS4s of the Construction Activity Permit includes procedures for SWPPP reviews which: 1) ensure consistency with State and local sediment and control requirements; 2) ensures that individuals performing reviews are adequately training; 3) that all SWPPPs are reviewed for sites which disturb one acre or greater; and 4) that the covered entity uses the MS4 Acceptance Form. While MS4s regulated since 2003 have generally met this BMP; updates and adjustments may be necessary. MS4s regulated since 2014 need to evaluate deadlines named in their NOI and adjust program goals accordingly.

46. 4-3 Compliance Mechanisms - No Land Use Control MS4s (County & Public Universities)

MS4s without land use control need to develop a program which ensures compliance with the Construction Activity Permit, as allowed under State and local law. Available mechanisms listed in the MS4 Permit include tenant lease agreements, bid specifications, requests for proposal, standard contract provisions, connection permits, maintenance directives/BMPS, access permits, consultant agreements, and internal policies. Procedures and policies must be developed for implementation and enforcement of these mechanisms. There must be a written directive form the person authorized to sign the NOI (MS4 Permit) stating that the updated mechanisms must be used and who (position(s)) is responsible for ensuring compliance with and enforcing the mechanisms for construction projects that occur on property owned, under easement to, within the right of way, or under the maintenance jurisdiction by the covered entity or within the maintenance jurisdiction of the MS4. The mechanisms and directives must be equivalent to the requirements of the NYSDEC SPDES General Permit for Stormwater Discharges from Construction Activity and address construction runoff requirements from new development and redevelopment projects.

#### 47. 4-4 Complaint Procedures-Construction Site Stormwater Runoff

The program must describe procedures for receipt and follow up on complaints or other information submitted by the public regarding construction site stormwater runoff. For MS4s regulated since 2003, updates and adjustments to these procedures may be necessary. MS4s regulated since 2014 need to evaluate deadlines named in their NOI and adjust program goals accordingly.

#### 48. 4-5 Construction Inspection and Enforcement Procedures

The program must describe procedures for site inspections and enforcement of erosion and sediment control measures including steps to identify priority sites for inspection and enforcement based on the nature of the construction activity, topography, and the characteristics of soils and receiving water. The procedures must also ensure that individuals performing the inspections are adequately trained and understand State and local erosion and sediment control requirements. Procedures for signing the "MS4 Acceptance" statement and the Notice of Termination need to be considered as well. For MS4s regulated since 2003, updates and adjustments to these procedures may be necessary. MS4s regulated since 2014 need to evaluate deadlines named in their NOI and adjust program goals accordingly.

#### 49. 4-6 Education - Construction Activity Procedures

Construction stormwater requirements need to be communicated by MS4s to individuals for whom these requirements apply. Typically pre-construction meetings are the prefered venue for explaining expectations, reviewing 4hr construction operator E/SC cards, distributing educational material, and explaining municipal inspection procedures. In addition to pre-construction meetings, formal procedures once written can be with shared with individual's responsible for managing storrmwater at the construction site. For MS4s regulated since 2003, updates and adjustments to these procedures may be necessary. MS4s regulated since 2014 need to evaluate deadlines named in their NOI and adjust program goals accordingly.

#### 50. 4-7 Construction Site Operator Training - 4 Hr

In order to meet the demand for trained Construction Site Operators, local Soil and Water Conservation Districts and other NYSDEC approved providers need to routinely host 4 hour Construction Site Operator Training events. Training events will be promoted by the Coalition members. During pre-construction meetings and on-site, MS4s will ask operators for their "4 Hr" cards, and if necessary, point out available training events. As needed, the Coalition will work with Albany County SWCD to co-sponsor timely "4Hr" E/SC training events.

#### 51. 4-8 Stormwater Pollution Prevention Plan (SWPPP) Record Keeping

Record keeping requirements are listed in the Permit, as follows: number of SWPPPs reviewed; number and type of enforcement actions; percentage of active construction sites inspected once; percentage of active construction sites inspected more than once; and number of construction sites authorized for disturbances of more than one acre. For MS4s regulated since 2003, SWPPP record keeping procedures are likely to be well established, however as more projects come on-line, these procedures may need to be revisited, updated, and different information tracked (dates, status of MS4 Acceptance Forms, status of completed projects and filing of Notice of Intents, etc.) MS4s regulated since 2014 need to evaluate deadlines named in their NOI and adjust program goals accordingly.

52. 5-1 Construction Activity Local Law-Post Construction Controls (Towns, Villages, Cities)

This BMP establishes a regulatory mechanism (law, ordinance, other mechanism) which requires post construction stormwater management controls for new development and re-development projects. The mechanism must be equivalent to one of the versions of the "NYSDEC Sample Local Laws for Stormwater Management and Erosion and Sediment Control" and equivalency to these sample local laws must be documented and certified by an attorney representing the MS4. MS4s regulated since 2003 have met this BMP. They are: Cities of Cohoes, Albany, and Watervliet; Towns of Colonie, New Scotland, Guilderland, and Bethlehem; and Villages of Colonie, Green Island, and Menands. MS4s regulated since 2014 need to evaluate deadlines named in their NOI and adjust program goals accordingly.

53. 5-2 Compliance Mechanisms and Post Construction Controls-No Land Use Control MS4s (County, Public University)

MS4s without land use control need to develop a program which ensures compliance with the Construction Activity Permit, as allowed under State and local law. Available mechanisms listed in the MS4 Permit include tenant lease agreements, bid specifications, requests for proposal, standard contract provisions, connection permits, maintenance directives/BMPS, access permits, consultant agreements, and internal policies. Procedures and policies must be developed for implementation and enforcement of these mechanisms. There must be a written directive from the person authorized to sign the NOI (MS4 Permit) stating that the updated mechanisms must be used and who (position(s)) is responsible for ensuring compliance with and enforcing the mechanisms for construction projects that occur on property owned, under easement to, within the right of way, or under the maintenance jurisdiction by the covered entity or within the maintenance jurisdiction of the MS4. The mechanisms and directives must be equivalent to the requirements of the NYSDEC SPDES General Permit for Stormwater Discharges from Construction Activity and address stormwater runoff from new development and redevelopment projects.

#### 54. 5-3 Planning Tools-Non Structural Stormwater Management

Covered entities, all MS4 types, must as stated in the MS4 Permit, develop and implement a program which includes a combination of structural and non-structural management practices (according to standards defined in the most current version of the NYS Stormwater Design Manual) that will reduce the discharge of pollutants to the maximum extent practicable. For Traditional MS4s, in the development of watershed plans, municipal comprehensive plans, open space preservation programs, local law, ordinances, and land use regulations, covered entities must consider principles of Low Impact Development (LID), Better Site Design (BSD), and other Green Infrastructure practices to the maximum extent practicable. In the development of the watershed plans, municipal comprehensive plans, open space preservation programs, local law, ordinances, and land use regulations, covered entities must consider smart growth principles, natural resource protection, impervious area reduction, maintaining natural hydrological conditions in developments, riparian buffers or set back distances for protection of environmentally sensitive areas such as streams, wetlands, and erodible soils. For Non-Land Use Control MS4s (ex. public universities, counties), in the development of environmental plans such as watershed plans, open space preservation programs, local laws, and ordinances, covered entities must incorporate principles of Low Impact Development (LID), Better Site Design (BSD), and other Green Infrastructure practices to the maximum extent practicable. Covered entities must consider natural resource protection, impervious area reduction, maintaining hydrological condition in developments, buffers or set back distances for protection of environmentally sensitive areas, such as streams, wetlands, and erodible soils in the development of environmental plans. Goals pertaining to individual MS4s explain how they will implement this BMP.

#### **Implementation Tasks Due Date Implemented Date Completed** Task **Measurable Goals** GoalMet Goal **Permit Year Due Date Date Goal Met** 2017 03/09/2017 1. 5-3 MG1 Albany County: Although no planning activities are anticipated by 3/9/2017, if the opportunity arises, the County will address the planning concepts included in this BMP. **Activities Activity Date Activity Description** 03/09/2017 GOAL DROPPED. #### 55. 5-4 Green Infrastructure Practices-Local Law Review & Revisions

Covered entities are required to review according to Green Infrastructure practices defined in the NYSDEC Stormwater Design Manual at a site level, and encouraged to review, and revise where appropriate local codes and laws that include provisions that preclude green infrastructure or construction techniques that minimize or reduce pollutant loadings. Most, but not all Coalition members have reviewed their local laws using the Stormwater Coalition Scorecard developed as part of a Green Infrastructure Model Local Law grant from NYSDEC (2012). Some Coalition members have revised their local codes or adopted policy documents using language developed as part of the grant funded Green Infrastructure Model Local Law project. Municipal/MS4 goals pertain to reviewing and revising code. They apply to MS4s permitted in 2003 and new MS4s permitted in 2014.

56. 5-5 SWPPP Review Procedures (Post Construction Controls)

**Implementation Tasks** 

SWPPP Review Procedures include: 1) consideration of potential water quality impacts; 2) review of individual SWPPPS to ensure consistency with state and local post-construction stormwater requirements; 3) ensure that individuals performing reviews are adequately trained and understand the State and local post construction requirements; 4) ensure that individuals performing the reviews for SWPPPs that include post-construction practices are qualified professionals (see MS4 Permit definition) or under the supervision of qualified professional; 5) all SWPPPs must be reviewed for sites where disturbance is one acre or greater; 6) after review of SWPPPs the covered entity must utilize the MS4 Acceptance form; and 7) utilize available training from Soil and Water Conservation Districst; Planning Councils; NYS Dept of State; USEPA; and/or NYSDEC to educate municipal boards and Planning and Zoning Boards on low impact development (LID) principles, better site design (BSD) approach, and green infrastructure (GI) applications. Individual MS4 goals pertain to MS4s permitted in 2003 and new MS4s permitted in 2014. Planning and zoning training goals are itemized in MCM 8 Training-Staff and/ or Municipal Officials. Multiple BMP Training Topics included in MCM 8 cover LID, BSD, and GI principles.

57. 5-6 Municipal, Zoning, Planning Board Training - Coalition Initiated (Better Site Design, Low Impact Development and Green Infrastructure Applications) [MOVED, see explanation]

Original SWMPv2 (2012 to 2015) Description: Covered entities must utilize available training to educate municipal boards, Planning and Zoning Boards regarding low impact development principles, better site design, and green infrastructure applications. Coalition members received grant money to organize workshops and four are scheduled. [EXPLANATION. Workshops implemented. This training requirement is, however, ongoing and has been moved to MCM 8 Training: BMP 8-2 Training Topic: Green Infrastructure, BSD, LID and Site Design Elements-For Planning/Zoning Bds (In House). Other MCM 8 Training BMPs may apply as well. As explained in MCM 8 Training, all training is now consolidated into one MCM.]

#### 59. 5-8 Inventory - Post Construction Stormwater Practices

**Implementation Tasks** 

Compendium

Since the inception of the MS4 and Construction Activity Permits in 2003, stormwater practices have been built, as described in the NYSDEC Stormwater Design Manual. It is the responsibility of MS4s appproving these practices to play a role in overseeing maintenance, to minimally include maintaining an inventory of practices built since 3/10/2003. The inventory includes at a minimum the location of the practice (street address or coordinates); type of practice; maintenance needed per the Design Manual or SWPPP or other provided documentation; dates, and type of maintenance performed. Effective and efficient record keeping is necessary. Municipal/MS4 goals pertain to MS4s permitted in 2003 and new MS4s permitted in 2014.

60. 5-9 Post Construction Practices-Long Term Operations & Maintenance (Inspections, Record Keeping, Training, Procedures) [RENAMED, see explanation]

To ensure that post construction practices are adequately maintained, post construction practices need to be inventoried, inspected, and monitored. Inspectors need to be adequately trained and record-keeping in place to successfully track the status of all practices and take action as needed. [EXPLANATION: The title of this BMP in the previous SWMPv2 (2012 to 2015) had been Operations and Maintenance. It has been revised to better explain and highlight the full range of MS4 responsibilities regarding post-construction practices.]

#### 61. 5-10 Banking and Credits-Watersheds

**Implementation Tasks** 

As stated in the permit, covered entities may include in the SWMP Plan provisions for development of a banking and credit system. MS4s must have an existing watershed plan based on offsite alternative stormwater management in lieu of or in addition to on-site stormwater management practices evaluated. Redevelopment projects must be evaluated for pollutant reduction greater than required treatment by the state standards. The individual project must be reviewed and approved by NYSDEC. Use of a banking and credit system for new development is only acceptable in the impaired watersheds to achieve the no net increase requirement and watershed improvement strategy areas to achieve pollutant reductions in accordance with watershed plan load reduction goals. A banking and credit system must at a minimum include: ensures offset exceeds standard reduction by factor of at least 2; offset is implemented within the same watershed; proposed offset addresses the POC of the watershed; tracking system is established for the watershed; mitigation is applied for retrofit or redevelopment; offset project is completed prior to beginning proposed construction; a legal mechanism is established to implement the banking and credit system. Goals pertaining to this BMP are limited. Although a potential opportunity for municipalities, there is only one impaired stream segment named in Appenidix 2 of the MS4 Permit (Shaker Creek tribs-Ann Lee/Stump Pond) and no watershed plan, thus unlikely that banking and credits will take place within that geographic area. Goals possible, but unlikely.

62. 5-11 Post Construction Maintenance-Resources [DROPPED, see explanation]

Original BMP SWMPv2 (2012 - 2015) Description: As more stormwater practices come on line, maintenance of green infrastructure practices may need to be addressed and programs developed to train individuals. Maintenance costs of green infrastructure need to be tracked for future reference. [EXPLANATION. This BMP as stated has been dropped. There are many concerns related to ever expanding responsibilities associated with MS4 oversight of post-construction stormwater management practices. They are a direct consequence of MS4 Permit language. To the extent possible these concerns are now addressed in MCM 7 Stormwater Program Management: BMP 7-3 Regulatory Realities-Tracking Changes, Preparation, and Response.]

#### 63. 5-12 Post Construction Practices - Reporting

Record keeping requirements are listed in the Permit, as follows: number of SWPPPs reviewed; number and type of enforcement actions or sanctions (non-traditional MS4s); number and type of post construction practices inventoried; number and type of post construction practices inspected; and number and type of post construction practices maintained. MS4s permitted in 2003 and 2014 need to consider how best to address record keeping requirements so that the meet the needs of the MS4 over time.

#### 64. 5-13 Impaired Waters-303d Listed-MS4 Permit-Appendix 2

According to the MS4 Permit, if a regulated MS4 discharges a stormwater pollutant of concern (POC) to an impaired water listed in Appendix 2, the covered entity must ensure no net increase in its discharge of the listed POC to that water. Two waterbodies named in Appendix 2 are in Albany County, the Basic Creek Reservoir and Ann Lee (Shakers) pond, Stump Pond. The pollutant of concern for both is phosphorus. Of these, Ann Lee and Stump Pond reside within the MS4 urbanized area and the associated watershed includes multiple MS4s. TMDL modeling and related data collection for Ann Lee and Stump Pond by NYSDEC is ongoing, with a draft TMDL plan to be submitted to EPA eventually. This BMP addresses the no net increase requirement.

#### 65. 6-1 Inventory-Municipal Facilities and Operations

Using as a guide, the Monroe County Stormwater Coalition Guidance to Developing an Effective Municipal Prevention and Good Housekeeping program and the Stormwater Coalition Self Audit Form (released 8/19/2014, or more recent version), inventories of municipal facilities and operations need to be completed for new MS4s permitted in 2014 and updated for MS4s permitted in 2003. The initial inventory provides a base-line list of MS4 owned facilities; assessments, in addition to identifying potential sources of pollution and necessary BMPs, clarify which of these facilities need to be re-assessed every 3 years. Goals related to this BMP reflect the status of inventories to date and information provided from regulators during multiple MS4 Permit audits since 2013.

#### 66. 6-2 Assessment - Municipal Facilities and Operations

**Implementation Tasks** 

developed for each facility.

Once the inventory is completed, facilities and operations need to be assessed, such that pollution generating activities are noted, existing BMPs identified, additional BMPs suggested, priorities set, measurable goals crafted, implementation schedules established, and the parties responsible for implementing the BMPs named. The performance and documentation of completed BMPs are noted as part of the self-assessement and for interested Coalition members can be tracked directly in this SWMP document according to categories named in the MS4 Permit and Annual Report. These categories are Street Maintenance (BMP 6-12); Bridge Maintenance (BMP 6-13); Winter Road Maintenance (BMP 6-14); Salt Storage (BMP 6-15); Storm System Maintenance (BMP 6-16); Vehicle and Fleet Maintenance (BMP 6-17); Park and Open Space Maintenance (BMP 6-18); Municipal Building Maintenance (BMP 6-19); Solid Waste Management (BMP 6-20); New Construction and Land Disturbances (BMP 6-21), Right Of Way Maintenance (BMP 6-22); Marine Operations (BMP 6-23); Hydrological Habitat Modification (BMP 6-24). The assessement occurs at a minimum frequency of every three years. Documentation and tracking of BMPs related to these assessments, which typically focus on facilities and to some extent operations occuring throughout the MS4, is at the discretion of individual MS4 Stormwater Program Coordinators. A commonly used form has been the BMP Summary Sheet included in the Monroe County Guidance Document; other forms, however have also been developed and used by Coalition members.

67. 6-3 Stormwater System Maintenance - Catch Basins - Annual Report Data

The inspection, clean out, and proper disposal of catch basin spoils is a recognized good housekeeping practice. The ability to routinely manage a clean out program varies from one municipality to another, often depending on the type of catch basins owned by the MS4, the ability to access catch basins, and other local considerations. BMP goals reflect these variations. Establishing base line data, such at the total number of catch basins in the MS4 is encouraged. The MS4 Permit Annual Report asks MS4s to provide catch basin data: # of catch basins inspected and cleaned where necessary. Goals reflect data requested in Annual Report.

Imple	mplementation Tasks						
Tas	(		Due Date	Implemented	Date Completed		
Meas	urable Goals						
Goa	I	Permit Year	Due Date	GoalMet	Date Goal Met		
1.	6-3 MG1 Albany County. By 3/9/2016, the Stormwater Program Techician will establish how many catch basins are currently mapped by Albany County and estimate the total number of unmapped catch basins. Priority inspection and clean out zones will be established. Inspection and clean out as needed. Number inspected and cleaned is recorded annually.	2017	03/09/2016

Activity Comment	

68. 6-4 Road Maintenance - Sweeping (Street and Parking Lots) - Annual Report Data

Sweeping roads and parking lots to remove sediment and other pollutants is a recognized good housekeeping practice. Numeric goals, if any, need to be matched clearly to data requested in the MS4 Permit Annual Report Form. They are: # acres of parking lots swept and # of road miles swept. Establishing base line data, such as total parking lot acreage and total road miles in the MS4 is encouraged. Such data encourages a more systematic approach to describing and accomplishing goals over a given time period. Goals presented here reflect questions in the Annual Report.

Impl	ementation Tasks				
Tas	k		Due Date	Implemented	Date Completed
Mea	surable Goals				
Goa	al	Permit Year	Due Date	GoalMet	Date Goal Met
1.	6-4 MG1 Albany County. By 3/9/2016, DPW crew will sweep smiles (both sides of road) and 10 acres of parking lots (urbaniarea, such as Nursing Home, TU Center, Health Dept Parking County Hockey facility).	ized	03/09/2017

6-4 MG2 C/Cohoes. By 3/9/2017, C/Cohoes stormwater staff reviews mandated street and parking lot sweeping schedule as itemized in the CSO BMP Annual Report. Street and parking lot sweeping is frequent, typically once a week depending on CSO requirements. Sweeping includes both combined and separated areas of the City. Data is provided in MS4 Permit annual report.	2017	03/09/2017	<b>V</b>	03/09/201
Activities				
Activity Date				
6-4 MG1 University at Albany. By 3/9/2016, the University at Albany will establish a GIS based mapping of all roads and parking lots that are swept and the frequency. The map will indicate which streets are maintained and the associated lengths in miles will be determined. It	2017	03/09/2016	<b>V</b>	03/09/201

will also include the parking lots and associated acreage. This information will provide a basis for determining the total amount of roads and parking lots that are swept.

69. 6-5 Pesticides & Herbicides Local Laws/Guidelines (Use & Notification)

Several MS4s have existing local laws or policies regarding pesticide and herbicide use. Due to staff changes, there may be limited awareness of what may already exist in a MS4/municipality. The purpose of this BMP is to make available for interested MS4s existing local laws/guidelines and to establish goals pertaining to their own adoption of future laws or guidelines. All pesticide and herbicide related local laws are posted on the Coalition website.

#### 6-6 Pest Management (IPM Plans, Policies, and Procedures)

If an MS4-muncipality has an existing integrated Pest Management program, the Stormwater Program Coordinator should be familiar with the document and in touch with personnel responsible for implementing the IPM. The SWMP Coordinator should also be familiar with pesticide applicator certification requirements and know to look for that documentation when individuals are applying pesticide or herbicide on municipal owned property. Given that some MS4-municipal staff may be unfamiliar with Pest Management options and Integrated Pest Management in particular, this now included as a training topics. See MCM 8 Training: BMP 8-15 Pest Management.

#### 71. 6-7 Pesticides, Herbicides, Fertilizers and Other Chemicals-Record Keeping/Usage - Annual Report Data

Pesticides, Herbicides, Fertilizers, and Other Chemical Records need to be tracked for the NYSDEC MS4 Permit Annual Report (# lbs of phosphorus applied in chemical fertilizer; # lbs nitrogen applied in chemical fertilizer; # acres of pesticide and herbicide applied (# acres applied x number of time applied to nearest tenth). For MS4s intending to reduce usage, such baseline data could be valuable. Data gathering and usage goals, if any, are included in this BMP.

#### 72. 6-8 Household Hazardous Waste Disposal - Amounts & Collection Dates

The purpose of this BMP is to track the amount of hazardous waste collected annually and removed as a threat to local waterbodies. Given variations in how and which MS4s participate in Hazardous Waste Collection Days, collecting data directly from NYSDEC solid waste program should be considered. Otherwise data can be collected by individual MS4s from staff who manage HHWD collection events. In addition to collection data, # of clean up events per Annual Report reporting year is useful data and may be presented here.

#### 73. 6-9 Staff Training [MOVED, see explanation]

Original BMP SWMPv2 ~2012 to 2015 Description: Staff training is a critical component of MS4 Permit implementation. The field of stormwater management is changing rapidly and multiple skill sets are needed for an effective program, with training across disciplines and departments important. This BMP serves to match who needs what kind of training using what mode of instruction. [EXPLANATION. To better track which municipal staff and officials have been trained in what, all training related BMPs have been consolidated into MCM 8 Training-Staff, Planning/Zoning Board and Other Municipal Officials. Individual MS4 training goals may be recorded in the MCM 6 section of the NYSDEC Annual Report document.]

#### 74. 6-10 NYSDEC SPDES Multi Sector General Permit

As stated in the MS4 Permit, the permit requires that "municipal operations and facilities that would otherwise be subject to the NYS Multisector General Permit (MSGP, GP-0-12-001) for industrial stormwater discharges to prepare and implement provisions in the SWMP that comply with Parts III, A, C, D, J, K and L of the MSGP. The covered entity must also perform monitoring and record keeping in accordance with Part IV of the MSGP. Implementation of the above noted provisions of the SWMP will ensure that MEP (Maximum Extent Practicable) is met for discharges from those facilities". For this reason, municipalties need to be familiar with existing and potential MSGP permits associated with their MS4. Goals for MS4s regulated since 2003 reflect their understanding of MSGP requirements and related oversight of existing MSGP permits. Facility BMPs need to consider MSGP requirements; use of the Stormwater Coalition Self Audit Form encourages the necessary analysis of existing facilities with regard to MSGP requirements. MS4s regulated since 2014 need to evaluate deadlines named in their NOI and adjust program goals accordingly.

89. 6-25 Reliance on Third Parties-Contracted Entity Certification Statement (Ind MS4s)

A consistent question by EPA and NYSDEC auditors has been the sign off by relevant vendors of the Third Parties-Contracted Entities Certification Statement Part IV G of the MS4 Permit. The purpose of this BMP is to call out this requirement directly, such that measurable goals for each MS4 are well documented and used as a reminder to encourage the timely completion of this requirement.

### **Implementation Tasks Task Due Date Implemented Date Completed Measurable Goals** Goal **Permit Year Due Date** GoalMet **Date Goal Met** 1. 6-25 MG1 V/Menands. By 3/9/2016 secure signed Third Party 2017 03/09/2016 Certification Forms from appropriate vendors. **Activities Activity Date Activity Description V** 6-25 MG1 Albany County. By 3/9/2016, develop standardized 2017 03/09/2016 03/09/2017 procedures and related forms pertaining to signed "Third Party Certification Statements" to be incorporated into future contracts. The contracts and related procedure/forms cover all aspects of stormwater management (general operations and construction). Secure signed Third Party Certification Statements from key vendors at risk of impacting water quality. **Activities Activity Date Activity Description** 3. 6-25 MG1 T/Guilderland. By 3/9/2016, the T/Guilderland SW Program 2017 03/09/2016 **V** 03/09/2016 Coordinator develops a list of vendors who provide services to the town. Vendor list represents individuals/companies which directly impact water quality. List is prioritized and Third Party Certification requirements explained to key vendors.

### 90. 7-1 Stormwater Coalition Management

Regular Working Group meetings, Board of Director's oversight, adequate funding for staff and administrative expenses, a legally binding intermunicipal agreement, and an awareness of the Coalition organizational structure relative to its members, provide a framework for Coalition operations. This BMP recognizes the tasks and time involved with maintaining the Coalition.

**Due Date**

### 91. 7-2 Local MS4/Municipal Management

Coordination across disciplines, departments, and facilities within an MS4 is key, as is adequate funding for the Stormwater Program, staff and materials. This BMP tracks and encourages this coordination and recognizes the importance of adequately funded program implementation. Organizational charts are updated routinely, used to evaluate training needs, and may be referenced in procedures documents.

7-3 MG2 Coalition. By 3/9/2017, the Coalition responds to the likely issuance by NYSDEC of a substantively revised MS4 Permit (2017 to ????). If members are interested, the Coalition Program Coordinator facilitates meetings and collects ideas and comments to be communicated to NYSDEC. Before submission, final comments are approved by the Board.

### **Activities**

	Activity Date	Activity Description
1.	03/09/2016	Provided DEC with suggestions for MS4 permit
2.	03/09/2017	Three sessions with Working Group reps to collect comments regarding draft MS4 Permit. Coalition comment letter submitted to NYSDEC 2/1/2017.

2017 03/09/2017 **✓** 03/09/2017 3. 7-3 MG3 Coalition. By 3/9/2017, where and if appropriate, the Coalition Coordinator organizes inter-municipal, Coalition-wide meetings to address issues of particular concern to members. Meetings may include regulators and others involved with permit implementation. Meetings are tracked and information is filed: agenda, attendance, date, outcome, and follow-up. Potential issues: municipal capacity to oversee ever expanding inventory of post-construction stormwater practices; role of inter-municipal entities with regard to MS4 Permit compliance; training needs related to green infrastructure design, construction, and maintenance; funding and administration in general; etc.

### **Activities**

# Activity Date Activity Description 1. 01/20/2017 Board meeting extended so that Board and Working Group could partipiate in Visionoing Session. Purpose to assess pros/cons of Coalition, think about future direction of Coalition. Status of MS4 Permit an element of discussion.

7-3 MG4 Coalition. By 3/9/2018, the Stormwater Coalition Program 2018 03/09/2018
 Coordinator provides routine updates to the Coalition Working Group
 and Board regarding the status of the MS4 Permit and other relevant
 SPDES Permits. Time permitting, Coalition responds to proposed
 changes to the MS4 Permit.

### 93. 7-4 Storm Water Management Program (SWMP) Document

The MS4 Permit states requirements regarding a Stormwater Management Program (SWMP) and Stormwater Management Program Plan (SWMP Plan). A SWMP by definition needs to include measurable goals for each best management practice. This BMP includes goals specific to the Coalition and members such that the SWMP document is updated annually using CBI MS4Permit Manager software and the content well integrated with the content of the NYSDEC Annual Report Form. Likely, for consideration over the next two years, is researching and potentially using the NYSDEC SWMP Template.

### **Implementation Tasks Task Due Date Implemented Date Completed Measurable Goals** GoalMet Goal **Permit Year Due Date Date Goal Met** 1. 7-4 MG1 Coalition. By 3/9/2016, the Coalition Stormwater Program 2017 03/09/2016 **✓** 03/09/2016 Coordinator establishes with the Working Group a schedule for updating the SWMP document which coincides with the annual filing of the MS4 Permit Annual Report by June 1. The purpose is to routinely update SWMP BMPs and Goals and to incorporate these goals into the Annual Report, Depending on resources, the SWMP document is either a Joint SWMP or individual SWMP document. In general the SWMP document attempts to describe all aspects of stormwater program implementation for both the Coalition and members, while the Annual Report is a snap shot of program progress. **Activities Activity Date Activity Description** 7-4 MG2 Coalition. By 5/7/2017, the Coalition Stormwater Program 2017 05/07/2017 Coordinator meets with each MS4 to update SWMP document using MS4Web, update coincides with filing of Joint MS4 Permit Annual Report by June 1. Intent is to bring Annual Report and SWMP goals into alignment and recalibrate program implementation. **Activities**

### 94. 7-5 Water Infrastructure GIS-AIMS Transition

To date, GIS technology has been embraced by the Stormwater Coalition as an important tool for implementing MS4 Permit requirements. Evidence of this is the grant funded Albany Internet Mapping System, which continues to be supported using Coalition dues, the Storm System/Storm Sewershed Intermunicipal Mapping, project, also grant funded, and continued financial support for two ESRI desktop licenses used by Coalition staff. At the MS4/municipal level, independent of Coalition led GIS initiatives some Coalition members have advanced, well established GIS systems, while others don't. AIMS is nearing the end of it's life cycle (hardware and software) and the Coalition needs to decide what to do. The purpose of this BMP is to establish goals related to a possible transition from one AIMS system to another.

### **Implementation Tasks**

Task	Due Date	Implemented	Date Completed

### **Measurable Goals**

Goa	ıl	Permit Year	Due Date	GoalMet	Date Goal Met
1.	7-5 MG1 Coalition. By 12/31/2015, Coalition staff will develop, circulate, and tabulate the results of a survey to find out how the current Albany Internet System Mapping is being used by members. Survey results will be used to clarify, "What next?" for AIMS and to develop various GIS options for Coalition members to consider. AIMS and GIS related decisions will be discussed by the Coalition Working Group and Board, then incorporated into the 2016 Coalition budget. Options will take into consideration: 1) MS4 Permit requirements related to field inspections, possibility of standardizing forms, and potential efficiencies if field work is immediately integrated with GIS; 2) spectrum of interested users and variations in capacity to collect mapping data, analyze data, and use GIS technology; 3) pros/cons/need for/capacity to develop a more comprehensive water infrastructure GIS; 4) role of the Coalition and "mission creep"; 5) administrative realities and funding considerations; 6) data sharing platforms, interests, and security concerns.	2017	12/31/2015		12/31/2015

#### 95. 7-6 Stormwater GIS and Program Mgmt Tools-Individual MS4s

**Implementation Tasks** 

The purpose of this BMP is to support individual MS4 initiatives which either currently use or would like to use GIS and related management technology to support stormwater program efficiencies (field work tablets, data collection forms, apps, cloud based technology, outfall mapping, storm system mapping, facility inventory mapping, post construction stormwater practices maps). These forms, devices, map layers, and procedures may serve as a testing ground for various GIS-related applications useful to all Coalition members and stormwater program implementation more generally.

#### **Task Due Date Implemented Date Completed Measurable Goals** GoalMet Goal **Permit Year Due Date Date Goal Met** 1. 7-6 MG1 T/Guilderland. #### 96. 7-7 Procedures and Forms Compendium

The purpose of this BMP is to consolidate procedures mandated in the MS4 Permit or as needed for program implementation into one document, organized to facilitate communication and help others understand over the long term who needs to do what, when, and why regardless of current staffing configurations. What to include in the compendium is at the discretion of the MS4. Likely groupings: public queries and/or complaints related to stormwater-IDDE and Construction Activity (MCM2 procedures); oversight of the construction activity permit (MCM4 and MCM 5 procedures); IDDE Program (MCM3 procedures); or Municipal Facilities and Operations-multiple categories (MCM6 procedures).

#### **Implementation Tasks Due Date Implemented Date Completed** Task **Measurable Goals** Goal **Permit Year Due Date** GoalMet **Date Goal Met** 1. 7-7 MG1 Albany County. By 3/9/2017, the Albany County Stormwater 2017 03/09/2017 **✓** 03/09/2016 Program Technician develops a compendium of procedures and forms which incorporate all procedures outlined in the MS4 Permit and itemized in MCM 4 (BMP 4-2 SWPPP Procedures (E/SC); 4-4 Complaint Procedures; 4-5 Construction Inspection & Enforcement Procedures: 4-6 Education-Construction Activity Procedures: 4-8 SWPPP Record Keeping) and MCM 5 (BMP 5-4 Green Infrastructure Practices Policy Document; BMP 5-5 SWPPP Review Procedures; 5-8 Inventory-Post Construction Practices; and 5-9 Post Construction Practices-Long Term Operation & Maintenance). Procedures Compendium will be reviewed by County Stormwater Committee. **Activities Activity Date Activity Description** 7-7 MG1 V/Menands. By 3/9/2017 the Village of Menands 2017 03/09/2017 Stormwater Program Coordinator will develop a compendium of procedures and forms which incorporate all procedures outlined in the MS4 Permit and itemized in MCM 2 (BMP 2-5 Queries/Complaint Procedures-Illicit Discharge, Construction): MCM 3 (BMP 3-8 IDDE Program Procedures); MCM 4 (BMP 4-2 SWPPP Procedures (E/SC); 4-4 Complaint Procedures - Construction Site Runoff; 4-5 Construction Inspection & Enforcement Procedures: 4-6 Education-Construction Activity Procedures; 4-8 SWPPP Record

Keeping); and MCM 5 (BMP 5-5 SWPPP Review; 5-8 Inventory-Post Construction Practices; 5-9 Post Construction Practices-Long Term Operation & Maintenance). The set of procedures will be integrated with all steps of the land use decision making process.

#### **Activities Activity Date Activity Description** 3. 7-7 MG1 C/Albany. By 3/9/2017, the C/Albany stormwater staff will 2017 03/09/2017 develop a comprehensive document of program procedures across multiple MCMs. The purpose is to provide for future coordinators an understanding of program priorities, routine requirements, and to have in writing a text which describes field related tasks. The document will specifically address MS4 oversight of BMPs across multiple departments internal to the City. **Activities Activity Date Activity Description** 7-7 MG1 C/Watervliet. #### 98. 7-9 Grant Management (REDC/NYSDEC WQIP Contract #C00081GG)

In 2015, the Coalition and Albany County as Coalition host and lead applicant applied for and received a grant award from NYSDEC of \$486,720 to fund mapping related to MS4 Stormwater Program implementation. Managing all aspects of the grant will be the responsibility of Coalition staff. This is in addition to routine management of Coalition operations. The goals presented in this BMP detail grant management activities for the duration of the grant which has a contract end date of 5/31/2020. This grant time frame extends beyond the time frame of the current MS4 Permit (GP-0-15-003) which expires 4/30/2017 and the time frame of the SWMP document, which is matched to the MS4 Permit Annual Reporting year, end date 3/9/2017. Goals presented here will need to be included in future SWMP and Annual Report documents, both for the Coalition and individual MS4s.

#### 99. 8-1 Topic: Clean Water Act Basics (In-House)

The purpose of this BMP is to effectively educate key MS4 staff and elected officials about the Clean Water Act such that the regulatory structure and intention of the stormwater regulations are well understood relatively to all other Clean Water Act SPDES, other water related regulations. Goals reflect MS4 determinations regarding who would benefit from the program and when and how they will participate in the training. Attendance is tracked by individual MS4s; included in the MS4 Permit annual report; and used to analyze training gaps internal to each MS4.

#### 100. 8-2 Topic: Green Infrastructure, BSD, LID and Site Design Elements-For Municipal/Planning/Zoning Bds (In House)

The purpose of this BMP is to educate municipal boards and Planning/Zoning board members about low impact development principles, the better site design approach, and green infrastructure applications. Such training is required in the MS4 Permit (Part VII.A.5.a.v.). Attendance is tracked by individual MS4s; included in the MS4 Permit annual report; and used to analyze training gaps internal to each MS4. Others, in addition to municipal/Planning/Zoning Boards, may be targetted for training.

#### 101. 8-3 Topic: Local Green Infrastructure Case Studies "Grand Rounds"

The purpose of this BMP is to establish a neutral, predictable place for a fair minded critique of local green infrastructure practices and case histories. The format is designed to encourage an interdisciplinary discussion across a wide range of disciplines (engineers, landscape architects, planners, builders, contractors, maintenance crews, bankers, municipal officials, etc.) from either the public or private sector. The case histories are not limited to site level green infrastructure practices; other scales to be considered as well (neighborhood and landscape). Attendance is tracked by individual MS4s and included in the MS4 Permit annual report.

#### 102. 8-4 Topic: Illicit Discharge Detection and Elimination [DVD: IDDE-A Grate Concern]

The purpose of this BMP is to educate appropriate municipal staff about illicit discharge (what they are), how to prevent these discharges; and how to elminate. The Coalition owns and circulated a DVD titled: IDDE-A Grate Concern. Circulation is coordinated at monthly Coalition Working Group meetings. Attendance is tracked by individual MS4s; included in the MS4 Permit annual report; and used to analyze training gaps internal to each MS4.

### 104. 8-6 Topic: Improper Waste Disposal-Liquids and Solids [DVD: Rain Check]

This training topic is called out in the MS4 Permit (MCM3) which states that a covered entity must inform public employees, businesses, and the general public of the hazards associated with illegal discharges and improper disposal of waste, and maintain records of notifications. The Coalition owns and distributes a training video titled "Rain Check" which covers this topic as do several other DVDs, but not as thoroughly (IDDE-A Grate Concern and Spills and Skills). Attendance is tracked by individual MS4s; included in the MS4 Permit annual report; and used to analyze training gaps internal to each MS4.

### 105. 8-7 Topic: Construction Site Inspections By MS4/Municipal Inspectors (In House)

The purpose of this BMP is to educate appropriate municipal staff and designated Stormwater Management Officers (SMOs) about current municipal inspection procedures and construction activity permit issues during construction. Attendance is tracked by individual MS4s; included in the MS4 Permit annual report; and used to analyze training gaps internal to each MS4.

#### **Implementation Tasks Due Date Task Implemented Date Completed Measurable Goals** Goal **Permit Year Due Date** GoalMet **Date Goal Met** 1. 8-7 MG1 University at Albany. The University at Albany currently has 2017 03/09/2016 staff trained using Erosion and Sedimentation Control courses recognized by the NYS DEC. By 3/9/2016, the University will continue to have relevant staff receive training for erosion and sedimentation control for construction projects so that they are knowledgeable of the requirements contained in project SWPPP's. **Activities Activity Description Activity Date** 2. 8-7 MG2 Unversity at Albany. ### 106. 8-8 Topic: Post Construction Practices-Municipal Inspector Training (In House)

The purpose of this BMP is to educate appropriate municipal staff, designated Stormwater Management Officers (SMOs), engineers, and others about current municipal inspection procedures and construction activity permit issues related to post-construction stormwater practices. Attendance is tracked by individual MS4s; included in the MS4 Permit annual report; and used to analyze training gaps internal to each MS4.

### 107. 8-9 Topic: Maintaining Green Infrastructure Practices-Demo Rain Gardens (In House)

The purpose of this BMP is to effectively educate appropriate municipal staff about how to maintain demonstration rain gardens owned by municipalities. The focus includes training related to native plants, invasives, soils, and other gardening basics. Where possible, lessons learned about demo rain gardens will be applied to other stormwater practices which rely on native plant vegetation.

# 114. 8-16 Topic: Construction Activity Permit (GP-0-15-002) NYS Office of Parks, Recreation, and Historic Preservation (OPRHP) Requirements

**Implementation Tasks** 

The NYS Construction Activity General Permit (GP-0-15-002) effective January 29, 2015 includes new forms related to Parks Recreation and Historic Preservation Law. MS4s responsible for Construction Activity Permit oversight need to be familiar with these requirements and as needed include the new forms into their SWPPP Review Procedures. Training may be necessary for MS4 staff, consulting engineers, and others. Attendance is tracked by individual MS4s; included in the MS4 Permit annual report; and used to analyze training gaps internal to each MS4.
